FOREWORD

The Machakos County Annual Development Plan (CADP) 2025/2026 serves as a crucial blueprint, outlining the development priorities and strategic direction for Machakos County for the financial year 2025/2026. The Plan is anchored on the provisions of the Public Finance Management Act (PFMA), 2012 Section 126, and Article 220(2) of the Constitution of Kenya, 2010.

The CADP 2025/2026 is the third annual successive Plan in the implementation of County Integrated Development Plan (CIDP), 2023-2027. It is closely aligned with national frameworks, including the Kenya Vision 2030, its Medium-Term Plan IV, the National Spatial Plan, and global commitments such as the UN Sustainable Development Goals (SDGs) and the African Union (AU) Agenda 2063 among others.

Central to this Plan is the Governor's Manifesto, which emphasizes three key pillars: Food Security, Socio-Economic Empowerment, and Infrastructure Development. These priorities are aimed at transforming the socio-economic well-being of Machakos residents.

The Plan encompasses detailed sectoral programmes complete with estimated costs, targets, an implementation Plan, and a monitoring and evaluation (M&E) framework. The Plan also provides a comprehensive review of sector and sub sector achievements, challenges encountered, lessons learnt and recommendations.

The County Government is committed to working collaboratively with National Government Departments and Agencies, Development Partners, Civil Society Organizations, the public and other key stakeholders in the implementation of this Plan. We are dedicated to upholding the principles of Integrity, Transparency, Efficiency, and Civic Engagement to deliver effective and impactful services to the people of Machakos.

God bless Machakos County.

Hon. Onesmus Kuyu

CECM-Finance, Economic Planning, Revenue Management and ICT

ACKNOWLEDGEMENT

The Machakos County Annual Development Plan (CADP) 2025/2026 was developed through a participatory approach, incorporating feedback from the public and all the key stakeholders across the County. I express my deepest gratitude to everyone who contributed to this endeavor.

I would like to particularly express my gratitude to H.E. Governor Wavinya Ndeti and H.E. Deputy Governor Francis Mwangangi for their exceptional leadership and for initiating the development of this Plan. My profound gratitude also goes out to Dr. Muya Ndambuki, the County Secretary, for his proficient coordination of the County departments and stakeholders. I thank Hon. Onesmus Kuyu, CECM-Finance, Economic Planning, Revenue Management and ICT, for his indispensable leadership in spearheading the whole process. I also recognize the support from all County Executive Committee Members and Chief Officers, which has been critical in bringing this Plan to realization.

My special appreciation to the CADP Secretariat composed of a team of Economists and Statisticians whose expertise and solid commitment played a pivotal role in the development of the Plan. Their tireless efforts, often going beyond the call of duty, cannot go unnoticed.

I acknowledge the dedication of various officers across all departments, who worked tirelessly to provide essential information. Their contributions not only enriched the quality of the Plan but also emphasized their commitment to County progress and well-being.

Finally, I wish to thank the residents of Machakos County, well-wishers, and all other stakeholders for their time, effort and goodwill in sharing their perspectives during the public participation process. The valuable insights significantly enriched this Plan, making it a strategic roadmap for sustainable development.

God bless you all.

EXECUTIVE SUMMARY

The Machakos County Annual Development Plan (CADP) for financial year 2025/2026 is a blueprint for the County's development. Building on prior successes, this plan includes a wide range of programs aimed at addressing significant socioeconomic concerns and capitalizing on potential opportunities for long-term development through collaboration and evidence-based decision-making. The main economic activities in the County contributing to the Gross County Product are: manufacturing; agriculture, forestry and fishing; wholesale and retail trade, and repair of motor vehicles; real estate activities and construction. The plan centres on economic development, social development and infrastructure enhancement. The plan is outlined in five chapters below.

Chapter one sets the context for the development plan. It outlines the overview of Machakos County and its competitive advantages, highlighting the rationale, preparation process of the plan and its linkage to with CIDP 2023-2027 and other development plans.

Chapter two presents the review of previous County Annual Development Plans which includes analysis of current CADP 2024/2025 against approved budget 2024/2025; financial performance review for FY 2023/2024; sector achievements in the previous FY 2023/2024; sector challenges; emerging issues; lessons learnt; recommendations and development issues.

Chapter three presents the sector strategic priorities programmes and projects the County intends to implement in the financial year 2025/2026. The priorities are highlighted per sector and mainstreams cross cutting issues including but not limited to Climate Change, Environmental Degradation, Gender, Youth, Persons with Disability and mitigating emergencies. The Key highlights of the chapter include:

Infrastructure Development: A substantial allocation is allocated to the modernization and expansion of vital infrastructure, such as energy infrastructure, water and sanitation facilities and transportation networks. It is hoped that these improvements will boost economic activity in addition to raising the standard of living for locals.

Economic Diversity: The plan emphasizes economic diversification by promoting sectors such as agriculture, manufacturing, and technology. Efforts are focused on building an enabling climate

for entrepreneurship, innovation, and attracting investments that would boost Machakos' economy to greater resilience and vibrancy.

Social Inclusion and Empowerment: The plan is based on a dedication to inclusivity and empowerment; which includes efforts to improve gender equality and social equity as well as access to social safety nets, affordable healthcare, education, and social safety nets. This will be integrated to ensure that all segments of the society benefit from the developmental strides.

Chapter four presents the implementation framework and resource requirement. It outlines the implementation framework budget; resource mobilization and management framework by sector and programme and risk management. It serves as the financial outline for the plan's implementation. The total resource requirement for the CADP 2025/2026 is estimated to be KSh. 32.09 billion which is allocated to 8 sectors. This will be financed through Equitable share, Conditional and non-conditional grants, own source revenue, and development partners. It is a comprehensive and ambitious plan that aims to transform Machakos County into a prosperous and vibrant place to live and work.

Chapter five details how the plan implementation progress will be monitored, evaluated and reported. It defines performance indicators, data collection methods, reporting mechanisms and periodic reviews and adjustments to ensure that the plan remains on track and effective. The plan underscores the significance of partnerships between Governmental institutions, Civil Society Organizations, private sector entities, and International Development Partners. A monitoring and evaluation framework is instituted to track progress, identify challenges, and enable dynamic adjustments as needed.

CHAPTER ONE: INTRODUCTION

1.1 Overview of the County

Machakos County is one of the 47 counties established in the first schedule of the Constitution of Kenya, 2010. Machakos Town is the County's largest town and serves as the County Government's headquarters.

The County is projected to have an estimated population of 1.5 million people in 2025 (Kenya Population and Housing Census). The County had a Gross County Product of KSh. 378,446 million (measured in current prices) in 2022 (GCP report, 2023). The main economic activities in the County contributing to the Gross County Product are: manufacturing; agriculture, forestry and fishing; wholesale and retail trade, and repair of motor vehicles; real estate activities and construction. The County is semi-arid and relies heavily on rain-fed agriculture. The main crops farmed include maize, beans, fruits, vegetables and drought-resistant crops like sorghum and millet.

The County is part of the Nairobi Metropolitan area, which comprises four other counties: Nairobi, Kiambu, Murang'a and Kajiado. The County is also a member of South Eastern Kenya Economic Block (SEKEB) which is composed of Machakos, Makueni and Kitui counties. Machakos County borders Muranga, Kirinyaga, Embu, Kitui, Makueni, Nairobi, Kiambu and Kajiado counties. The County has a total land area of 6,037.3 Km² and is located between longitudes 36°45' East and 37°45' East and latitudes 0°45' South and 1°31' South. This is illustrated in figure 1.1 below.

Figure 1. 1: Geographical Location of the Machakos County in Kenya

Source: Machakos County Spatial Database

The County has distinctive topographical and physical characteristics. There are hills rising between 1800 – 2100m above sea level and the Yatta Plateau which is elevated to about 1700m above sea level and slopes to the South East. The soils in the plains are shallow, well-drained, dark and red clay soils. In addition, the vegetation varies according to altitude throughout the entire County. The high altitude regions receive more rainfall and have dense vegetation and the plains are characterized by open grassland and sporadic trees. The main rivers in the County are Tana and Athi.

The County experiences bimodal rainfall pattern. The County's rainfall distribution is primarily influenced by the altitude. The lowland areas get about 500mm of rain on average, compared to 1,000mm in the high areas like Mua. The temperatures range from 18 to 29 degrees Celsius throughout the year. The majority of the County's terrain is hilly, and some of its physical features include the Yatta Plateau and the River Athi – one of the County's main water sources.

Machakos County is divided into eight (8) constituencies, nine (9) sub counties, forty (40) wards, twenty seven (27) divisions, seventy six (76) locations and 239 sub locations (KNBS, 2019). The County has 13 urban areas, namely Athi-river, Githunguri, Kangundo, Kathiani, Kithimani, Machakos, Makutano (Kyumbi), Masii, Matuu, Mlolongo, Oldonyo-Sabuk, Tala and Wamunyu (KNBS, 2019).

The County is an excellent area to invest. The County offers several benefits that make it an appealing destination for businesses of all sizes, which can be linked to the following factors:

- Machakos County is strategically situated next to Jomo Kenyatta International Airport and Nairobi City. This makes it an ideal location for businesses seeking to access the large market in Nairobi and worldwide.
- The Machakos County government is committed to creating a pro-business environment. The county offers a variety of incentives to attract investors, including land grants and access to credit.
- It has a diverse economy that entails manufacturing, agriculture, real estate, construction, wholesale and retail trade, and the service industry among others. This makes it a preferred investment hub since the portfolio reduces risks, expands opportunities, and boosts competitiveness.

- The County is rich in natural resources such as fertile land and minerals. This provides investors with many opportunities to set up businesses in the agriculture, energy and mining sectors.
- The County has a well-educated and trained workforce and has a number of universities and technical colleges, which produce graduates who are well-trained and skilled.
- Machakos County has a positive business environment characterized by a relatively peaceful and stable political environment and adherence to the rule of law. This creates a safe and attractive location for businesses and investors, providing them with assurance of legal protection, access to markets and the potential to grow and prosper in a peaceful and supportive environment.
- The County is connected by a good road network. Some of the main roads that are in the County include; the Nairobi express highway, Mombasa highway, Namanga road, Machakos - Kitui road, Garissa road and Wote road. The County also hosts Standard Gauge Railway and two of its termini, Athi river and Nairobi Terminus. It is adjacent to Jomo Kenyatta International airport. This facilitates trade allowing for a smoother flow of products and commodities.

1.2 Rationale for Preparation of the County Annual Development Plan

The County Government Act, 2012 and the Public Finance Management Act (PFMA), 2012 stipulate that development plans should form the basis for appropriation of public funds. Section 126(1) of the PFMA, 2012 provides that every County Government shall prepare a development Plan in accordance with Article 220(2) of the Constitution.

Section 104 (1) of the County Government Act, 2012 provides that a County Government shall plan for the County and no public funds be appropriated outside a planning framework developed by the County Executive Committee and approved by the County Assembly. The County planning framework is mandated to integrate economic, physical, social, environmental and spatial planning.

The CADP provides a roadmap for the County's development agenda for the financial year 2025/2026, sets out a clear vision for the County's development and identifies key priorities on which the County Government will focus for the financial year.

1.3 Preparation Process of the CADP

The process started with a review of the previous CADP i.e. (CADP FY 2023/2024), where there was documentation of the following: key achievements; sector challenges; lessons learnt; recommendations and development issues.

The Machakos CADP FY 2025/2026 was prepared in an interactive and participatory manner with many stakeholders including the public, County Government departments, development partners and civil society organizations participating to obtain perspectives on the most urgent and pressing needs and priorities. The people's voices were gathered through village-level public participation, followed by sub county level engagements, and submission of memoranda. These fora were used to gather and identify possible projects for implementation in the forthcoming financial year.

Submissions from all departments and inputs from citizens and other stakeholders were analyzed and considered in preparation of this Plan. In addition, a detailed analysis of the prevailing County's social, economic, political and environmental situations was conducted, which included a review of accessible data reports and studies to understand the context and identify challenges and opportunities.

Based on this analysis and needs assessment, SMART performance indicators and planned targets aligned to overarching development strategies and priorities were set. These strategies include a description of the projects and initiatives that will be undertaken to address the identified needs and the related resource requirement. In addition, a clear monitoring and evaluation framework was developed to track the implementation of the identified initiatives.

1.4 Linkage of CADP with CIDP and other Development Plans

A series of County Annual Development Plans (CADPs) are used to implement the CIDP which is a five-year plan that sets the strategic priorities of the County Government. The CIDP contains: programmes with specific goals and objectives; cost implementation plan; monitoring and

implementation framework and clear reporting framework. The CIDP is the basis for all the budgeting and planning in the County.

The County Annual Development Plan 2025/2026 will be used to implement the third year of the CIDP 2023 – 2027.

CHAPTER TWO: REVIEW OF THE IMPLEMENTATION OF PREVIOUS CADP

Chapter two provides general review on implementation of the previous CADP 2024/2025. It presents an analysis of county performance in terms of revenues, expenditures and key outcomes as well as the major challenges faced in the implementation of the Plan, lessons learnt and recommendations.

2.1 Analysis of CADP 2024/2025 Allocation against Approved Budget 2024/2025

This section aims to establish a connection between the current County Annual Development Plan (CADP) and the County budget. It also creates a link between CADP 2024/2025 and CADP 2025/2026, ensuring continuity and alignment in planning. Additionally, this section provides a sector-specific analysis of budget allocations, comparing the funding designated for the planned programmes and projects in CADP 2024/2025 with the allocations outlined in the approved budget for the same year.

2.2 Financial Performance Review for FY 2023/2024

This section provides a comprehensive evaluation of the County's inflows and outflows in the financial year 2023/2024.

2.2.1 Revenue Performance

At the start of the financial year 2023/2024, the County established specific revenue collection targets. In this section, a comparison is made between the actual revenue collected in the period under review, against set targets, identifying any variances that may have occurred.

2.2.2 Expenditure Analysis

This section provides a detailed analysis of the budget allocations for various programmes in the financial year 2023/2024 compared to the actual expenditures incurred. Additionally, it shows the absorption rate, which measures the percentage of the allocated budget that was actually utilized. This analysis is crucial for assessing the effectiveness and efficiency of financial management, identifying areas where resources may have been under or over utilized, and making recommendations for future budgeting and financial planning.

	Goal 6: Blue/Ocean economy for accelerated economic growth	• Sustainable exploitation of resources in the oceans, rivers and lakes • Provided programmes aimed at conserving water bodies

2.7 Sector Challenges, Lessons Learnt and Recommendations

2.7.1 Agriculture and Co-operatives Development Sector

2.7.1.1 Challenges

- i. Heavy/prolonged rainfall and flooding (March-April-May)/long rains;
- ii. Unavailability of certified crop seeds in the country occasioned by previous failed seasons due to drought;
- iii. High costs of inputs (fertilizer, seeds and other clean planting materials);
- iv. High infestation of migratory (FAW) and other common pests;
- v. Pre and Post-harvest losses;
- vi. Declined soil fertility;
- vii. Inflation, fuel cost went up as well as cost of repair and maintenance;
- viii. Delayed processing of requisitions for purchase of goods and services;
- ix. Late disbursements for conditional grants (NAVCDP);
- x. Low funding;
- xi. High staff - farmer ratio to delivery support extension services;
- xii. Poor staff mobility;
- xiii. Very poor working environment;
- xiv. Under staffing (refer to capacity assessment rationalisation for public service - CARPS);
- xv. Low staff morale;
- xvi. Aged work force without proper succession management plan.

2.7.1.2 Lessons Learnt

- i. Enhance and strengthen research and extension linkages;
- ii. Cordial interaction with development partners as per the participation and financial agreements and MOUs;
- iii. Collaboration even at departmental level to avoid duplication of services especially in the provision and distribution of inputs aimed at increasing productivity (refer to co-operatives development);
- iv. Mobilization of resources from within and externally to address some challenges facing the sector;

- v. Utilization of the technical capacities optimally;
- vi. Staff motivation.

2.7.1.3 Recommendations

- i. Technical staff recruitment and trainings (short & long courses) both local and overseas;
- ii. Improvement of work environment, refurbishment or new construction especially county & sub county headquarters;
- iii. Improve the mobility of field staff for delivery of services;
- iv. Increase budget for the sector to address challenges of productivity and commercialization of the major value chains;
- v. More resource mobilization from National Government and other development partners.

2.7.2 Commercial, Tourism and Labour Affairs Sector

2.7.2.1 Challenges

- i. Delayed allocation and disbursement of funds;
- ii. Inadequate staffing at the Parks, Machakos Arts Center and Culture sector;
- iii. Lack of sufficient working tools, machinery, equipment and stationery to maintain and operate the Parks in the County;
- iv. Lack of personal protective equipment (PPEs) for the staff working at the Parks;
- v. Restoration of features at the Machakos People's Park e.g. dancing fountain and miniature golf course;
- vi. Lack of proper land records in cultural sites and public parks preventing proper allocation of funds and restoration;
- vii. The industrial development sub programme is not sufficiently funded. As a result, the sub programme activities were not fully implemented;
- viii. The sector is not provided with adequate technical staff, especially in innovation development;

- ix. There exists no sufficient baseline data, feasibility studies, and mapping studies, to objectively inform sector programme policy implementation, e.g. innovation mapping, industrial mapping.
- x. There exist no particularized County policy frameworks to guide and regulate the industrial sector in the County. The department has already drafted required bills;
- xi. The sector is not well-facilitated with vehicles which can be used for fieldwork and compliance inspections;
- xii. Legal constraints on requirements such as public participation may derail project implementation, especially when there are no available budgets for public participation.

2.7.2.2 Lessons Learnt

- i. Early and timely funds allocation for key programmes and projects;
- ii. Proper planning and engagement of all staff throughout the CADP planning;
- iii. Budgets for co-funded projects from the donor side and the County side should be provided, because the donor co-funded projects have a special vote, while the County budget is subjected to the normal budgeting;
- iv. The donor funding depends on the County efforts in implementing a project. If the County does not make an effort to implement the project, the donor does not release the funds;
- v. Contingencies like unprecedented floods can interfere with a project, leading to delay in the implementation, thereby leading to delayed absorption of funds, and in return leading to spill over of project to the next financial year;
- vi. Delays in funding a project can lead to poor absorption of the budget, and unnecessary expiry of budgetary appropriations (unabsorbed budgets);
- vii. A project should never start without a ready public participation report.

2.7.2.3 Recommendations

- i. There is need to complete and activate the various policies touching on Culture, Tourism, Film and Liquor sub sectors through funding;
- ii. Ensure an efficient funding framework in critical areas in the parks with the possibility of ring-fencing day to day allocations for smooth running of the parks

- iii. Since Culture and Tourism sub sector form part of the service industry that catalyses growth and investment in the other sectors, there is need to prioritize funding in areas that were not covered in FY 2023/2024 in order to spur development and growth;
- iv. Finance the projects as per the work plan, and ensure timely release of funds towards the projects;
- v. Comprehensive stakeholder engagement should be done to avoid delaying or stalling the projects.

2.7.3 Education, Youth and Social Welfare Sector

2.7.3.1 Challenges

Education Sub sector

- i. Slow off take of projects and programs;
- ii. Inadequate financial allocation to complete old projects and establish new projects e.g. ECDE classrooms, VTC centers, learning materials and equipment;
- iii. Effects of climate change (flooding) which damaged education facilities (classrooms, ablution blocks, dormitories etc.) hence disturbance in learning environment;

Youth and Sports Sub sector

- vi. Lack of adequate funding;
- vii. Delay in release of funds;
- viii. Insufficient budget allocation;
- ix. Insufficient staffing;

Gender and Social Welfare Sub sector

- x. Inadequate budget allocation;
- xi. Staffing gaps at the Ward level;
- xii. Transport challenges in the sub counties.

2.7.3.2 Lessons Learnt

Education Sub sector

- i. Timely planning;
- ii. Continuous monitoring and evaluation of projects and programmes;

Youth and Sports Sub sector

- iii. Need to lobby for more budget allocation from the County Assembly;

Gender and Social Welfare Sub sector

- iv. Continue engaging the County Administration officers at the Ward level;
- v. Need to partner with stakeholders.

2.7.3.3 Recommendations

Education Sub sector

- i. Projects and programs be allocated adequate budget as planned;
- ii. Collaboration with the National Government for timely release of funds from the exchequer is key for efficient implementation of the planned programs;
- iii. Citizen and stakeholder engagement in planning, monitoring and evaluation is critical achieving the set targets and for ownership of projects;
- iv. Need for feasibility studies and adequate preparation for programs and projects;

Youth and Sports Sub sector

- v. Continuous engagement with the County Assembly to ensure proper budgeting;
- vi. Public private partnerships to help in implementing some projects;
- vii. Proper staffing;

Gender and Social Welfare Sub sector

- viii. Increase budget allocation;
- ix. County to employ Gender and Social Welfare officers at the Ward level;
- x. Procure a Social Welfare Double cabin pickup for field work.

2.7.4 Energy, Infrastructure and ICT Sector

2.7.4.1 Challenges

Energy Sub sector

- i. Vandalism of Floodlights and Streetlights systems;
- ii. Technological trends;
- iii. High cost of Plant and Equipment;
- iv. Political interference in project implementation;
- v. Budget constraints in project funding;
- vi. Most posts installed were wooden; most have expired and need to be replaced;
- vii. O&M vehicles are frequently grounded;

Roads and Transport Sub sector

- viii. **Funding:** road investments are capital intensive but limited resources are available to address all the challenges for a huge network of roads falling within the mandate of the county department of roads;
- ix. **Capacity building:** the road sector players from sector professionals to political players require an objective capacity building to shape their thinking on the holistic approach in road investments;
- x. **Overstretching the available resources/funds:** due to high stakes in roads development and enormous challenges, the resources have been spread too thin without consideration of maximum benefits, optimised engineering design and programmed maintenance of already constructed roads. At time the ceilings are considered without taking into account scoping requirements for specific road investment;
- xi. **In appropriate settlement and solid waste management in urbanised areas:** this has led to flooding of roads and clogging of drains as a result of settlement in water ways and solid waste dumping in drains sometimes compounded by adverse rains;
- xii. **Overloaded traffic:** although roads deteriorate with time for the entire service life, optimised engineering design and construction ensures such deteriorations are manageable within 15 to 20 years of a road project design life. However, overloaded traffic undermines

the importance of optimised engineering design and construction rendering road maintenance very costly and unmanageable;

- xiii. **Lack of Roads Infrastructure Investment Prioritisation Policy Document:** a policy document is required considering cost benefit analysis for entire road network under the mandate of county department of roads which prioritises investment based on roads infrastructure that reaps maximum socio-economic benefits for the county government and residents. Further, the document should map the entire county roads network based on three main road infrastructure investment value delivery objectives for each road segment including road surveying and opening value delivery, and all whether road value delivery and increased speeds value delivery;

ICT Sub sector

- xiv. Budget constraint: allocation of adequate budget to the ICT department for ICT projects;
- xv. Policy gaps to support ongoing ICT projects, example new revenue streams.

2.7.4.2 Lessons Learnt

Energy Sub sector

- i. There is a need to implement the Projects in Phases for the department to achieve the planned targets;
- ii. Public participation and sensitization is very key in every project implementation specially to curb vandalism because the more the citizens are involved in projects identification the more likely they will own the projects after commissioning;
- iii. Quarterly Monitoring and Evaluation of Projects is necessary for better transparency and accountability;
- iv. Public Private Partnering is key in resources mobilization and should be embraced;

Roads and Transport Sub sector

- v. Regular continuous routine and periodic maintenance through regrading, re-gravelling, protection works, patch works, recarpeting/resurfacing, sometimes reconstruction etc.;

- vi. Empirical comparison between low-cost roads vis a vis standard roads has shown that high capital investments in roads projects results to a more resilient infrastructure that is sustainable in terms of maintenance and better level of service;
- vii. Use of county resources to open up new surveyed roads hence improving accessibility within all corners of the County has played a critical role not only in socio-economic front but county government visibility across the county as well;

ICT Sub sector

- viii. There is need to work together as a team so as to ensure successful implementations of every ICT project;
- ix. There is need for refresher courses for the ICT staffs for them to acquire new skills and knowledge;
- x. There is need for creation of awareness for the users of ICT equipment and systems e.g. on usage of ICT equipment and systems;
- xi. There is need for sensitization to the public to inform them what is available for them from the County e.g. training on usage of the revenue system for payment of licenses, training on usage of the County website and email to access information.

2.7.4.3 Recommendations

Energy Sub sector

- i. Sensitizing the public on importance of owning Government projects, this will help us curb vandalization of commissioned infrastructure;
- ii. Prioritizing on getting feedback/reports on status of projects to improve turnaround time;

Roads and Transport Sub sector

- iii. Performance contracting for roads prone to clogging and higher deterioration especially surfaced roads more so in urbanised and sand sourcing areas;
- iv. Enforcement of axle load policies and regulations particularly for County mandated roads in respect to areas near quarries and sand sourcing sites;

- v. Allocation of higher budgets to accommodate more works for roads to address most of needs within a road project or reducing the number of projects and increasing ceilings for each project;

ICT Sub sector

- vi. Budgeting for allocation of adequate budget to the ICT department;
- vii. Formulating and/or updating relevant laws and policies;
- viii. Collaboration with various willing development partners to offer digital skills training.

2.7.5 Health Sector

2.7.5.1 Challenges

- i. Inadequate health facilities: many health facilities are under-resourced and lack essential medicine, medical equipment and infrastructure;
- ii. Staff shortage: inadequate health care professionals which affect both quality of care and service delivery;
- iii. Access issue: geographic and transportation barriers (hard to reach) make it difficult for residents in remote areas to access health services;
- iv. Disease burden: high prevalence of diseases (both communicable and non-communicable) exert more pressure on the already burden health products and technology.

2.7.5.2 Lessons Learnt

- i. **Importance of Strategic Planning and Flexibility:** the ADP 2023/2024 implementation emphasized the need for a well-defined strategic plan that is adaptable to evolving circumstances. The dynamic nature of healthcare demands, particularly in the wake of global health challenges, highlighted the necessity of flexibility in planning and resource allocation. Going forward, it is imperative to incorporate contingency plans within the ADP to allow for rapid response to emerging health threats;
- ii. **Strengthening Health Systems through Partnerships:** the partnerships forged with local and international stakeholders, including non-governmental organizations, the private

sector, and development partners, proved critical in addressing health challenges. For instance, collaborations with Huru International and the Kenya Diabetes Management and Information Centre significantly bolstered the County's capacity to deliver specialized health services. Future ADPs should prioritize the continuation and expansion of such partnerships to leverage additional expertise and resources;

- iii. **Enhancing Health Infrastructure:** the construction and upgrading of health facilities, including the new Level 4 hospitals and maternity units, demonstrated the substantial benefits of investing in health infrastructure. However, delays in the operationalization of these facilities, largely due to staff shortages, underlined the need for synchronized planning between infrastructure development and human resource allocation. Future plans should ensure that staffing and training needs are anticipated and met concurrently with infrastructure projects;
- iv. **Challenges in Supply Chain Management:** the quarterly procurement of medical supplies faced challenges such as delays and stock outs, impacting service delivery. This experience underscores the necessity of enhancing the efficiency of supply chain management systems. A more robust monitoring and feedback mechanism is required to ensure timely procurement and distribution of essential supplies. Additionally, exploring alternative procurement strategies, including framework agreements and bulk purchasing, could mitigate these challenges;
- v. **Leveraging Technology for Improved Service Delivery:** the rollout of the Health Medical Information System (Aphi-one) was a significant milestone in improving service delivery and revenue collection. However, gaps in training and the digital literacy of healthcare workers were identified as barriers to the full utilization of the system. Future ADPs should focus on comprehensive training programs to build the capacity of healthcare workers in utilizing digital tools, alongside expanding the system to more facilities;
- vi. **Need for Sustainable Health Financing:** the ongoing efforts to enact Facility Improvement Financing Acts and increase health insurance uptake revealed the challenges in achieving financial sustainability in the health sector. These initiatives are crucial for reducing reliance on unpredictable donor funding. The lessons from this period stress the importance of sustained advocacy and public education on the benefits of health insurance.

Additionally, the County must explore innovative financing mechanisms to ensure consistent funding for health programs;

- vii. **Community Engagement and Health Policy Implementation:** the success of health programs is significantly influenced by community involvement. Lessons from 2023/2024 highlighted the importance of grassroots-level engagement in both policy formulation and implementation. Engaging community health volunteers and local leaders in sensitization and feedback processes can enhance the relevance and acceptance of health interventions. Future ADPs should aim to deepen community participation to ensure that health policies are culturally appropriate and effectively address the population's needs;
- viii. **Governance and Accountability:** strengthening governance structures and accountability mechanisms within the Department of Health was identified as a critical factor in achieving ADP goals. Transparent decision-making processes and regular audits were essential in maintaining the integrity of health programs. Lessons learned indicate the need for continuous capacity building in governance and a more structured approach to monitoring and evaluation;
- ix. **Addressing Human Resource Constraints:** the recruitment and retention of healthcare workers remained a significant challenge, affecting the operationalization of new facilities and the overall quality of care. This underlines the need for innovative strategies to attract and retain skilled health personnel, including offering competitive remuneration, continuous professional development opportunities, and creating a conducive working environment;
- x. **Environmental Considerations in Health Planning:** the growing impact of climate change on health was evident during the implementation period, necessitating a more integrated approach to health and environmental planning. Lessons from the year highlight the need to incorporate climate change mitigation and adaptation strategies within the ADP. This includes building climate-resilient health infrastructure and promoting environmentally sustainable practices in healthcare delivery.

2.7.5.3 Recommendations

- i. **Enhance Strategic Planning and Crisis Preparedness:** develop more flexible and adaptive planning frameworks that incorporate contingency measures for unforeseen health crises. Establish a dedicated crisis management team to ensure rapid response and resource mobilization during emergencies;
- ii. **Strengthen and Expand Health Partnerships:** build on successful collaborations by formalizing partnerships with existing stakeholders and exploring new partnerships with organizations focused on emerging health issues. Focus on creating long-term partnerships that provide sustained support for county health initiatives;
- iii. **Synchronize Infrastructure Development with Human Resource Planning:** ensure that new health facilities are operationalized promptly by aligning infrastructure projects with human resource planning. Prioritize the recruitment and training of healthcare workers in tandem with the construction of new facilities;
- iv. **Improve Supply Chain Management Systems:** establish a more efficient procurement process by adopting a centralized supply chain management system that ensures timely delivery of medical supplies. Consider implementing framework agreements and bulk purchasing strategies to minimize stock outs and reduce procurement delays;
- v. **Scale up Digital Health Solutions:** expand the rollout of the Health Medical Information System (Aphi-one) to all county health facilities. Implement comprehensive training programs to enhance the digital literacy of healthcare workers and ensure the effective utilization of technology for service delivery;
- vi. **Promote Sustainable Health Financing:** accelerate the enactment of Facility Improvement Financing Acts and intensify efforts to increase health insurance coverage among county residents. Explore innovative financing mechanisms, such as public-private partnerships and social impact bonds, to ensure the sustainability of health programs;
- vii. **Foster Community Engagement and Participation:** strengthen community engagement by involving local leaders, community health volunteers, and residents in the planning and implementation of health initiatives. Develop culturally sensitive health policies that reflect the needs and preferences of the local population;
- viii. **Strengthen Governance and Accountability Mechanisms:** enhance governance structures by conducting regular capacity building sessions for health administrators and

- managers. Implement a robust monitoring and evaluation framework to ensure accountability and transparency in the implementation of health programs;
- ix. **Address Human Resource Gaps:** develop targeted strategies to attract and retain healthcare workers, including offering competitive salaries, professional development opportunities, and improving working conditions. Explore partnerships with training institutions to create a pipeline of skilled health professionals for the county;
 - x. **Integrate Environmental Considerations into Health Planning:** incorporate climate change mitigation and adaptation strategies into the ADP, focusing on building climate-resilient health infrastructure and promoting environmentally sustainable practices in healthcare delivery. Collaborate with environmental agencies to address the impact of climate change on public health;
 - xi. **Promote Health Education and Awareness:** intensify health education campaigns to improve public awareness of preventive healthcare, healthy lifestyles, and the importance of health insurance. Utilize multiple communication channels, including social media, community outreach and health facilities, to reach a broader audience;
 - xii. **Focus on Data-driven Decision Making:** strengthen the capacity for data collection, analysis, and utilization to inform evidence-based decision-making. Regularly update health data systems and ensure that decision-makers have access to real-time information to guide policy and resource allocation.

2.7.6 Land, Environment and Natural Resources Sector

2.7.6.1 Challenges

Lands and Physical Planning Sub sector

- i. Delay in release of funds for development projects, leading to stalling of projects;
- ii. Inadequate training of the staff across the department;
- iii. Resource Constraints: limited financial resources posed a significant challenge when implementing development plan. Machakos, like many other counties in Kenya, faced budgetary constraints, which hindered the execution of planned projects and programs;

- iv. Poor infrastructure in roads, ICT and electricity, hindered service delivery making it challenging to attract investments. This affected the overall progress of development projects;
- v. Economic fluctuations negatively impacted the availability of funds and the feasibility of development projects. Rapid inflation strained budgets and reduced resources for development;
- vi. Vandalism and misuse of community completed projects rendered some projects non-functional;

Housing and Urban Development Sub sector

- vii. Delay in the Budget approval process;
- viii. Delay in exchequer releases by the national treasury;
- ix. Conditional requirement for donor funding;
- x. Under staffing;
- xi. Delay in transfer of municipality functions;
- xii. Budget constraints limiting effective and efficiency in service delivery e.g. maintenance of vehicles and operational cost;
- xiii. Delay in payments of contractors and suppliers;
- xiv. Limited resources and need for conducive working environment;

Environment and Natural Resources Sub sector

- xv. Inadequate budget;
- xvi. Inadequate staff;
- xvii. Climate change;
- xviii. El nino rains;
- xix. Inadequate enforcement of environment policies;
- xx. Unstructured revenue collection system;

Climate Change Sub sector

- xxi. **Delayed Disbursement of Funds:** the sector faced significant delays in the disbursement of funds, which hindered the timely implementation of climate change mitigation and adaptation projects. This impacted the ability to address climate challenges proactively;
- xxii. **Extreme Weather Events:** the county experienced a range of extreme weather events, including prolonged droughts and intense rainfall. These events disrupted local communities and strained infrastructure, highlighting the vulnerability of the region to climate change;
- xxiii. **Slow Implementation of Climate Policies:** although climate action plans were in place, their implementation was slowed by bureaucratic challenges and capacity constraints within the sector. This delay reduced the effectiveness of interventions aimed at mitigating climate impacts;
- xxiv. **Vulnerability of Agricultural Systems:** the county's agricultural sector, which depends on stable weather patterns, was heavily affected by climate variability. Crop failures and reduced yields emphasized the need for more resilient agricultural practices and better support systems for farmers;
- xxv. **Infrastructure and Technological Gaps:** existing infrastructure and technology were often insufficient to support climate adaptation measures. This included the lack of robust early warning systems for extreme weather and inadequate infrastructure for managing water resources effectively.

2.7.6.2 Lessons Learnt

Lands and Physical Planning Sub sector

- i. Timely funding of projects/activities;
- ii. Necessity of training of new employees, this will enable easier delivery of services;
- iii. There is need to increase mobilization of resources internally and externally from Development Partners to bridge the Development budget gap;
- iv. Ensure collaboration with Development Partners and Government Departments to enhance services delivery;
- v. Prioritization of projects;

- vi. Development plans should be flexible enough to accommodate unexpected challenges or opportunities;
- vii. There is need to establish early warning systems for climate and continuous sensitization to citizens to adapt to climate change impacts;
- viii. Consider the environmental impact of projects and incorporate sustainable practices which ensures long-term benefits without harming the environment;
- ix. Maintain open and transparent communication with all stakeholders by regularly updating the public on progress, challenges and achievements;
- x. Identify potential risks and develop risk mitigation strategies. These include financial risks, political risks, and external factors that could affect the plan's success;
- xi. Consider the long-term impact of development projects and their sustainability beyond the annual plan by ensuring that short-term goals align with long-term development objectives;

Housing and Urban Development Sub sector

- xii. Early budget planning, approval and processing of procurement plans;
- xiii. Proper management of the cash flow for payment of goods and services;
- xiv. Engagement of the stakeholders for financial support;
- xv. Delay in release of funds result in pending bills and spill over of the projects;
- xvi. Partners have set minimum conditions are not in tandem with the pace of county approval process;

Environment and natural Resources Sub sector

- ix. Early planning to aid in completion of projects on time;
- x. Adopt drought resistance tree seedlings species for increased survival rate;

Climate Change Sub sector

- xi. **Critical Importance of Timely Funding:** the delays in disbursement of funds significantly impacted the ability to execute climate action plans. Ensuring that funds are released on time is essential for the effective implementation of climate change initiatives;

- xii. **Necessity for Resilient Infrastructure:** the extreme weather events over the past year underscored the need for more resilient infrastructure that can withstand climate-related challenges and ensure continuity of essential services;
- xiii. **Need for Expedited Policy Implementation:** the slow pace of implementing climate policies highlighted the importance of streamlining processes and reducing bureaucratic hurdles to respond more swiftly to climate change impacts;
- xiv. **Enhanced Support for Agriculture:** the vulnerability of the agricultural sector to climate variability pointed to the need for stronger support systems, including the promotion of climate-resilient agricultural practices and better access to resources for farmers;
- xv. **Investment in Technology and Infrastructure:** the gaps in existing infrastructure and technology demonstrated the need for increased investment in early warning systems, water resource management, and other critical areas to better prepare for and respond to climate challenges.

2.7.6.3 Recommendations

Lands and Physical Planning Sub sector

- i. The County needs to mobilize additional resources to bridge the resources gap by collaborating with other government agencies, non-profit organizations, private sector entities, and international donors to leverage additional resources and expertise;
- ii. There is need to cultivate ownership of projects by the community through civic education and community involvement in designing and implementing projects;
- iii. Ensure budget allocation for continuous projects that are implemented in phases.
- iv. Establish effective project management and monitoring mechanisms by using project management software or tools for tracking;
- v. Invest in training and capacity building for staff and Project Management Committees' members involved in implementation. This can enhance the skills needed to manage and execute projects effectively;
- vi. Integrate environmentally sustainable practices into development projects. Ensure that projects do not harm the environment and consider long-term environmental impacts;

- vii. Conduct a thorough evaluation at the end of each implementation cycle. Analyze what worked, what didn't and why. Use these insights to improve future plans;

Housing and Urban Development Sub sector

- viii. Development partners should engage the counties in coming up with minimum conditions;
- ix. Need to improve on the budget approval process and procurement system;
- x. Recruitment of additional staff in both technical and support services;

Environment and Natural Resources Sub sector

- xi. Seek for external mobilization of resources and collaboration with partners and relevant stakeholders;
- xii. Staffing of the department to improve performance;
- xiii. Develop a well structured revenue collection system;
- xiv. Develop climate change adaptation and resilient strategies;
- xv. Improve facilitation to improved enforcement of environment policies;

Climate Change Sub sector

- xvi. **Ensure Timely Disbursement of Funds:** establish mechanisms to guarantee the prompt release of funds for climate change projects, minimizing delays and enabling timely implementation of critical interventions;
- xvii. **Invest in Climate-resilient Infrastructure:** prioritize the development and enhancement of infrastructure that can withstand extreme weather events, ensuring that essential services remain operational during climate-related disruptions;
- xviii. **Streamline Policy Implementation Processes:** simplify and expedite the processes for implementing climate policies, reducing bureaucratic delays, and enabling more agile responses to emerging climate challenges;

- xix. **Support Climate-resilient Agriculture:** develop and promote climate-resilient agricultural practices, providing farmers with the tools, knowledge, and resources needed to adapt to changing weather patterns and safeguard their livelihoods;
- xx. **Enhance Technological and Infrastructure Capabilities:** invest in advanced technology and infrastructure, such as early warning systems for extreme weather events and improved water resource management systems, to better prepare for and mitigate the impacts of climate change;
- xxi. **Strengthen Cross-Sectoral Coordination:** foster stronger collaboration among different sectors and government levels, creating integrated climate change strategies that leverage resources and expertise from all relevant stakeholders;
- xxii. **Capacity Building and Training:** focus on building the capacity of staff and stakeholders within the climate change sub sector, ensuring they are equipped with the skills and knowledge needed to implement effective climate adaptation and mitigation measures.

2.7.7 Public Administration Sector

Challenges	Lessons Learnt	Recommendations
Finance Services Sub sector		
• Delay in disbursement of funds from the exchequer • Insufficient budgetary/funds allocation • Low own source revenue collection not able to realize set targets	• Need for timely release of funds from the exchequer • Lobby for adequate budget • Need for improved own source revenue collection	• Collaboration with the National Government for timely release of funds from the exchequer • Provision of adequate budget • Improved strategies on own source revenue collection
Economic Planning & ERM Sub sector		
• Placement of budgetary ceilings • Delay in release of funds by the national treasury • Inadequate staff • Delayed release of guidelines for preparation County Annual Development plan 2025/2026	• Collaboration with the National Government for timely release of funds from the exchequer is key for efficient implementation of the planned programs • Enhanced resource mobilization and public-private partnerships within and without are key in addressing inadequate resources allocation	• There should be continued collaboration with the National Government to ensure timely release of funds from the exchequer. • There should be enhanced resource mobilization and public-private partnerships within and without to assist in implementation of county programs
Revenue Management Sub sector		

Challenges	Lessons Learnt	Recommendations
• CIFOMS System downtime during the financial year • Inadequate capacity building of revenue clerks especially the newly recruited • Lack of proper coordination between revenue collecting departments and the service provision department	• There is need for an optimal revenue management system • Capacity build staff improves efficiency and improvement in collection • Revenue collection is a collective duty which needs proper collaboration across the County	• Acquisition of a new revenue management system • Continuous capacity building of revenue clerks • Frequent collaboration meetings between the departments
Public Service & Performance Management Sub sector		
• Inadequate funding and approval of insufficient budget for Medical and WIBA Insurances. • Lack of awareness regarding occupational safety and health in all departments leading to increase in WIBA claims. • Late remittance of pensions and gratuity monies to the respective pension schemes/funds. • Pending bills. • Slow response from IPPD headquarters. • Delay in submission of appointment documents from staff and the appointing authority in order to finalize appointment process. • Unstable network connectivity (internet). • Inadequate training budget. • Delayed payment of training fee to the relevant training institutions. • Inadequate performance management sensitization. • Inadequate registry space. • Inadequate facilitation for office operations, equipment, stationaries etc.	• Adequate financial resources are important in implementing effective, efficient and timely management of human resource. • There is need to invest more in capacity building and training of staff. • Timely Payment of allowances is important for effective training outcome. • There is need to sensitize officers on performance management. • There is need to adopt IT in office operations.	• Prioritization on budgeting for staff welfare initiatives. • Collaboration between leaders and stakeholders at various levels is key in realization of occupational safety and health • Building partnerships and alternative funding programmes to ensure availability of adequate financial resources. • Need to allocate enough funds to settle the pending bills. • Ensure timely remittance for employer contribution on gratuity and pension. • Provide financial education and retirement planning for employees by offering seminars and workshops, to help them understand the importance of retirement savings and make informed decisions about their pension and gratuity benefits. • The office recommends that officers should be paid once they have personal numbers. • Allocation of adequate funds for capacity building and development of staff. • Allocation of adequate funds for performance management. • To avail adequate funds for equipment and office operations. • Need for renovation and expansion of the county personnel registry. • Need for an emergency exit door in the building.

Challenges	Lessons Learnt	Recommendations
Inspectorate Services, Firefighting and Emergency Services Sub sector		
- Limited mobility to facilitate optimal enforcement - Progressive staff attrition - Absence of an Inspectorate Act - Conflict following duplication of roles between departments such as the Inspectorate department versus the revenue department and Lands department - Poor staff motivation - Inadequate working tools - Recurrent incidents of theft in county premises in the absence of security surveillance mechanisms	- The department urgently requires the establishment of an Inspectorate Act to harmonize the enforcement agenda. - The department needs to address the understaffing problem which exposes security provision thereby forcing some departments to outsource security services to fill the gap. - Limited mobility in the department has led to gaps in compliance enforcement making it difficult to achieve optimal revenue generation - The absence of career development guidelines has contributed to stagnation of employees in job groups for several years leading to low morale and the resultant departure of staff in pursuit of career advancement opportunities.	- Conduct needs assessment to inform resource scheduling. - Fastrack the enactment of legislation to formalize the inspectorate as an independent enforcement entity of all county laws. - Fastrack the enforcement of career development guidelines to facilitate employee advancement. - Benchmark to identify best practices used to enforce compliance and replicate applicable ones to the Machakos situation.
County Public Service Board Sub sector		
- Insufficient budget - Inadequate office space	- Lobby for adequate budget - Collaboration and partnership with stakeholders	Provision of adequate budget
Office of the County Attorney Sub sector		
- Insufficient budgetary/funds allocation - Understaffing	The need to involve staff in the Department during the budget formulation process to ensure all the projects/programmes of the Department are provided for and sufficiently budgeted for.	- There is need for adequate funding - Recruit additional staff, that is, Legal Officers and other technical staff needed in the Office

2.7.8 Water and Irrigation Sector

2.7.8.1 Challenges

The County Government of Machakos faced several challenges in the Water and Irrigation sector during the financial year 2023/2024:

- i. **Delayed Exchequer Disbursement:** the late release of funds from the exchequer significantly impacted project timelines, resulting in only 50% completion of planned construction works;
- ii. **Timeframe Constraints leading to sub optimal utilization of allocated resources:** due to these funding delays, the County struggled with effectively utilizing allocated resources, which further hindered progress on key infrastructure projects;
- iii. **Infrastructure Gaps:** persistent gaps in essential water and sanitation infrastructure have made it difficult to provide reliable services, with ongoing construction efforts progressing slower than anticipated;
- iv. **Environmental and Climate-related Issues:** the County's water and sanitation services were also disrupted by environmental factors such as droughts and floods, which further strained the already challenged sector.

2.7.8.2 Lessons Learnt

- i. **Importance of Timely Funding:** the delays in exchequer disbursement highlighted the critical need for timely financial support to ensure smooth project execution and prevent disruptions in essential services;
- ii. **Need for Resilient Infrastructure:** the extreme weather conditions over the past 13 months underscored the necessity of investing in resilient infrastructure that can withstand climate variability and environmental challenges;
- iii. **Enhancing Resource Utilization:** the challenges in fully capitalizing on available funding pointed to the importance of improving resource allocation processes and ensuring that financial resources are utilized effectively and efficiently;
- iv. **Strengthening Project Management:** process optimization challenges emphasized the need to enhance project management practices, focusing on better coordination, planning, and execution to avoid delays;

- v. **Adaptability in Operations:** the experience of dealing with both droughts and floods demonstrated the need for more adaptable and responsive operational strategies that can quickly adjust to changing circumstances.

2.7.8.3 Recommendations

- i. **Improve Timeliness of Funding Disbursements:** collaborate with relevant stakeholders to ensure more predictable and timely disbursement of funds, minimizing delays that impact project completion and service delivery;
- ii. **Invest in Resilient Infrastructure:** prioritize the development of infrastructure that is robust enough to handle extreme weather conditions, ensuring that the water and irrigation sector can continue to function effectively despite environmental challenges;
- iii. **Enhance Resource Allocation and Utilization:** implement strategies to optimize the use of allocated resources, ensuring that funds are fully absorbed and directed towards the most critical projects;
- iv. **Strengthen Project Management and Coordination:** focus on improving project management practices, with an emphasis on better planning, coordination, and monitoring to reduce inefficiencies and ensure timely completion of projects;
- v. **Adopt Adaptive Operational Strategies:** develop flexible and responsive operational plans that can quickly adapt to unexpected changes, such as climate-related disruptions, ensuring continuity of services in all conditions;
- vi. **Capacity Building and Training:** invest in the capacity building of staff within the water and irrigation sector to enhance their skills in project management, financial planning and operational efficiency;
- vii. **Public Private Partnerships:** Explore opportunities for collaboration with the private sector to leverage additional resources, expertise, and innovation in addressing the challenges within the water and irrigation sector.

2.8 Emerging Issues

Emerging issues refer to newly arising challenges or trends that are drawing attention in various fields and vary greatly depending on the context. Some of the emerging issues across different sectors include:

- i. Inflation and Economic Stability: concerns over inflation rates, cost of living, and economic stability in the wake of global events like pandemics and geopolitical tensions;
- ii. Climate Change: ongoing concerns about global warming, extreme weather events, and their impacts on ecosystems and human health;
- iii. The emergence of new crop and livestock pests and diseases, such as the fall armyworm;
- iv. The rapid evolution of technology and its impacts;
- v. Digital marketing and networking;
- vi. Locust infestations that devastate crops and pasturelands.

2.9 Development Issues

Development issues describe the various impediments that can hinder a region's economic growth, social progress, and overall well-being. These issues can be multifaceted, impacting different sectors and requiring comprehensive strategies to address them effectively. The programmes formulated in chapter three are geared towards addressing the issues identified below.

2.9.1 Agriculture and Co-operatives Development Sector Development Issues

Development Issues	Cause(s)	Constraint(s)*	Opportunities**
Agriculture Sub sector			
Crop Development Unit			
Reliance on Rainfed Agriculture	Inadequate investment in irrigation	- Change in weather patterns - Price volatility	Existence of permanent rivers for abstraction
Market in access	- Stiff competition - Stringent requirements by EU & regional markets - Seasonality	Lack of incentives or inadequate/insufficient subsidies	Market information through some platforms
Low productivity	- Erratic rainfall - Pest & diseases infestation - Declining soil fertility	Lack of diversification	- Availability of Drought Tolerant Crops, DTCs - Cheap labour
Fragmented/uneconomic farmlands	- Population growth pressure - Competition by other lucrative	Low returns to investments	- Intensive & precision farming technologies - Farm hand book-zoning/land use maps

Development Issues	Cause(s)	Constraint(s)*	Opportunities**
	developments- real estates • Land policies		
Policy guidelines	• Incoordination in implementation	• Legislations of such with many MDAs & SAGAs e.g. food/feed safety	• Reviews/customization of policies • Political good will
Lack of entrepreneurial skills	• Traditional/subsistence farming	• Illiteracy levels • Mindset/behavioural change to embrace agribusiness	• Well-trained extension personnel, private/public • Competence based learning(demos)
Lack of capital to invest in agriculture	• Inadequate funds • Knowledge gap • Expensive credit facilities	• High cost of inputs	• MFIs & commercial banks with tailor made product
Frequent and prolonged droughts	• Climate Change	• Inadequate funding and technological gaps (mitigation & Adaptation)	• Investment in climate smart agriculture technologies such as agro-forestry, riparian area protection, appropriate tillage methods, adoption of good agricultural practices • Planning for climate Resilience and adaptation plans
Low commercialization of agricultural production	• Unstructured markets and inadequate market information • Lack of zoning of enterprises	• Limited knowledge among the farming communities	• Availability of Strategic crops and livestock; market linkages; market information systems; aggregation centres and marketing structures • E-platforms for marketing • One Product- one location • Purchase of Software for Mapping ecological zones
High incidences of crop and livestock pests and diseases	• Climate change and poor management technique	• Inadequate early warning and control system	• Invest in climate change mitigation strategies • Embrace drought tolerant crops and livestock • Improve early warning systems and control

Development Issues	Cause(s)	Constraint(s)*	Opportunities**
			strategic of pests and diseases affecting crops and livestock
High post-harvest losses	Highly informal and unstructured market system	Technological and knowledge gaps	- Linkage of service providers in storage equipment to farmers - Promotion of appropriate technologies and structures in post-harvest handling, storage - and management of crop produce - Encourage formation of Farmers' marketing Associations for crop and livestock products
Lack of Strategic County Food reserve	- Lack of strategic Food Reserve Fund - Lack of County strategic food storage	Inadequate funding	- Provision of bulking and aggregation centres - Strategic food reserves - Construction of silos
Low value addition of agricultural produce	High cost of doing value addition	Technological and knowledge gaps	Promotion of value addition and agro-processing
Environmental degradation and over exploitation of natural resources	Use of inappropriate farming technique	Technological and knowledge gaps	Promotion of environment conservation for sustainable agricultural production
Inadequate extension services	Low staff to farmer ratio; Lack of modern agricultural training, demonstration and excellence center	Budgetary constraints	Improvement of agricultural extension services through recruitment and blending of technology with current methods of extension; Modernization of Machakos agricultural training centre
Low mechanization of agricultural production	High cost	Technological and knowledge gaps	Improve access and use of agricultural tools, machines and Equipment
Livestock Development Unit			
Inadequate inputs/feed resources to support a vibrant dairy industry	- High cost of inputs - Un organized milk marketing	Technological gaps, budgetary constraints	- Promote production of high quality feed resources - Promote formation/strengthening of dairy co-operatives - AI promotion

Development Issues	Cause(s)	Constraint(s)*	Opportunities**
Subsistence and unsustainable Poultry production	- Local poultry breeds - High input costs	Budgetary constraints	- Promotion of commercial poultry production - Homemade Feed formulation - Promotion of BSF farming
Low value addition in beef and goats	Dependence on local markets	Technological gaps	Promotion of feed lot production of beef and goats
Diversification of livestock farm enterprises	Narrow base	Budgetary constraints	Promotion of pig, rabbit farming, poultry and emerging livestock
Inadequate quality livestock and fish feed	Lack of Quality inspectors	Technological and knowledge gaps	- Promotion of access to quality livestock feed - Lack of gazetted inspectors
Low livestock production and products	- Climate change - Lack of resilience Strategies and plans for Risk reduction and drought mitigation plans	- Policy and knowledge gaps - Budgetary allocation	- Invest in climate change mitigation strategies - Stakeholder participation in livelihood restoration
Diminishing indigenous germplasm	Limited restriction on importation of foreign breeds	Policy gaps	Conservation and preservation of Animal Genetic Resource
Uncoordinated interventions from various stakeholders	Lack of harmonized intervention approaches by various players	Policy gaps	Ensure coordinated Development in the Livestock Sector (establishment of County agriculture sector co-ordination committee, CASCOT)
Inadequate plans for drought mitigation and preparedness for livelihood recovery and resilience	Lack of adaptation plans and resilience strategy	- Policy Gaps - Lack of livestock resilience policy - Budgetary allocation	- Collaboration within departments - Stakeholder involvement
Data gaps	Limited emphasis on livestock and crop data during national census	Budgetary constraints	Promotion of regular surveys, Livestock and Crops Census
Diminishing bee population and honey and bee products production	Vegetation change and low investment in bee keeping	Technological constraints	- Promote modern bee keeping and tree planting - Enhance bee keeping
Veterinary Services Unit			
Lack of full compliance to Public Health and Environmental Standards	Inadequate enforcement officers	Budgetary constraints	Ensure quality control in slaughterhouses
Low vaccination coverage	Inadequate vaccines and low priority to disease control	Budgetary constraints	Advocacy for more resources allocation and collaboration with partners

Development Issues	Cause(s)	Constraint(s)*	Opportunities**
Animal welfare concerns	Knowledge gaps	Cultural perceptions towards animal welfare	Enforcement of Animal Welfare act
Unlicensed health service providers	Inadequate animal health professionals	Budgetary constraints	Public sensitization and enforcement of compliance to animal Vet Surgeons and Vet Para-professional Act (CAP 366)
Lack of disease and food safety diagnostic	Poorly equipped laboratory and lack of lab technologist	Budgetary constraints	Rehabilitation, staffing and equipping the veterinary laboratory at Machakos HQs to serve for both disease and food safety laboratory
Lack of poultry house	Inadequate value addition in poultry	Budgetary constraints	Collaboration with partners to construct a poultry slaughterhouse
Fish Development Unit			
Climate change and Over exploitation of natural fish resources	Inadequate monitoring, control, surveillance and management of fish reserves	Technological and knowledge gaps	- Improve Fish Stock Monitoring, Control, Surveillance and - management of fish in natural water bodies; promotion of efficient and production systems - promotion of climate change adaptation and resilience measures
Low quantity and quality of fish produce and products	Inadequate quality assurance, value addition and marketing	Technological and knowledge gaps; inadequate extension staff	- Improve fish production Quality assurance, Value addition and Marketing - Promotion of fingerlings production and multiplication - Adoption of new technologies
High cost of farm inputs	Macro economics	Cost factors	Promotion of availability and access to quality farm inputs
Cross Cutting Issues			
High cost of agricultural inputs equipment and services	- Inflation, - Non competitive market	Lack of farm inputs subsidy	- Subsidy for farm inputs and equipment - Promotion/formation of service providers
Lack of clearly defined agricultural input support policy	Lack of certified input inspectors	Lack of domesticated policies	- Trained Agricultural Officers - Development of policy to ensure quality farm

Development Issues	Cause(s)	Constraint(s)*	Opportunities**
			inputs (pesticides, herbicides, fertilizer) • Subsidy to farmer inputs
Inadequate supply of quality seed materials	• Few seed Multiplication centres	• Lack of quality seed supply	• Establish of Propagation and multiplication units for crop seeds, seedlings, fingerlings, chicks
Nutrition insecurity	• Overreliance on narrow food recipe and processed foods	• Technological and knowledge gaps	• Promotion of farm family nutrition through locally produced foods
Food Security and Quality assurance	• Inadequate policies • Inadequate human capacities • Skill gaps in food safety	• Inadequate enforcement on food safety standards • Foods • Lack of coordination and harmonization of Food safety	• Integrating Food safety and quality assurance issues in Work plans/activities
Inadequate involvement of Youth, women and disabled	• Marginalization	• Access to resources	• Gender mainstreaming
Inadequate ICT skills in Agriculture	• Limited Funds	• Inadequate personnel and equipment • Inadequate technical know how	• Capacity building of staff • Purchase of ICT equipment • Internet Connectivity
Co-operatives Development Sub sector			
Poor governance of co-operativesocieties	• Lack of training	• Resources for training	• To enhance Training
Low registration of new co-operatives	• Lack of awareness on importance of co-operativememberships	• Resources for registration	• More registrations possible
Low coffee production	• High cost of production, unstable prices to farmers	• Resources and training	• Higher production possible • Promote coffee production
Low participation of youth and women in co-operatives	• Lack of interest and training	• Inadequate funds for training	• Creating interest of the youth and women in agricultural value chain; • Participation and management roles of the societies; • Digitization of the societies' operations to uptake the youth and women
Poor performance of dairy co-operatives	• Inadequate management skills, low milk production,	• Inadequate managerial skills of societies, Poor cattle breeds,	• Capacity building to the management;

Development Issues	Cause(s)	Constraint(s)*	Opportunities**
	inadequate coolers, and milk handling equipment	inadequate resources to purchase equipment	- Promotion of artificial insemination technology; - Equipping dairy co-operatives in progress
Delayed uptake of technology in digitization of co-operative operations	Lack of resources to install computers and software in co-operatives	Resources and training	- Provision of equipment and training on know-how; - Digitization of the societies' operations
Poor financial management in co-operatives	Shortage of audit services	Resources to carry out audit	Carry out audits in all co-operatives societies

2.9.2 Commercial, Tourism and Labour Affairs Sector Development Issues

Development Issues	Cause(s)	Constraint(s)*	Opportunities**
Tourism Sub sector			
School of Excellence for Tourism and Hospitality industry	The institution is key for the setting of industry standards and as a coordinating agency of government in the industry	Lack of Funds	The land for construction is available. The industry players can chip in and own the development of the institution for their service
Culture Unit			
Building of cultural centres	Lack of proper public land records in cultural sites and parks	Lack of Funds	Proper land mapping and spatial allocation of the public utilities can be done
Building of a County Library and Archive Center	There is a need to archive and preserve important cultural information and artefacts for posterity	Lack of Funds	The land is available for construction. The National Government Library Services and the Museums of Kenya can assist in funds and technical advice on setting up of the institution
Liquor Unit			
Building a Rehabilitation center	Abuse of substances and addiction	Lack of Funds	A feasibility study can be done to guide the process of establishing the institution
Industry and Innovation Sub sector			
Post-harvest management losses	Lack of cold storage and aggregation facilities	Financing for aggregation and post-harvest management facilities	The CAIP program will address the issue of post-harvest management leading to value addition and agro-processing.

Development Issues	Cause(s)	Constraint(s)*	Opportunities**
Industrial Planning	Lack of industrial masterplan	Industrial planning is affected, especially where industries and households are within the same zone.	Industrial masterplan would enhance industrial planning, infrastructure development

2.9.3 Education, Youth and Social Welfare Sector Development Issues

Development Issues	Cause(s)	Constraint(s)*	Opportunities**
Education Sub sector			
Inadequate ECDE caregivers with CBC and special/inclusive education knowledge	Low qualified ECDE teacherwith Competence Based curriculum (CBC)s & inclusive Knowledge	- Minimal qualified personnel - Low succession management crisis is also looming due to aging staff where most have attained retirement age	- Promote implementation of stronger labour market interventions and policy reforms that drive employment creation - Public Private partnership for expertise training
Low enrollment rate in ECDE centers	- Poverty - Inadequate Infrastructure; - Information gap;	- Parents Economically challenged - Insufficient resources like infrastructure - Insufficient capacity building	- Public Private partnership - Feeding Program - Provision of Modern and assorted psycho-motor material - Provision of Day care - Stake holder involvement
Low retention rate of learners in schools	- Poverty - Teacher-learner ratio - Infrastructure - Classes not enough and some too far	- Parents Economically challenged - Timely and effective planning to employ more teachers and replacement of those who have left through natural attrition (retirement, death and relocation) - Classes not enough and some too far	- Feeding Program - More budget for employment of more teachers - Public private partnership
Expensive education system- Basic Education & Competence Based Curriculum (CBC)	New Education system in the country hence cross cutting issue of personnel, infrastructure, teaching & leaning materials	Insufficient resources (teaching and learning resources, infrastructure and personnel)	- Public private partnership - Bursaries allocation
Policy Implementation	Low Resource mobilization	- Insufficient resources - Political Goodwill	Public-private partnership

Development Issues	Cause(s)	Constraint(s)*	Opportunities**
	• Goodwill		• Stakeholders' involvement
Insecurity	• No proper Fence/perimeter wall & guards	• Insufficient resources	• Public private partnership • Fencing • Provision of professional security • Disaster management
Inadequate VTC Trainers	• Inadequate Financial support • Goodwill	• Insufficient resources • Political goodwill	• Public private partnership • Stake holder involvement
Inadequate VTC infrastructure	• Inadequate Financial support • Goodwill	• Insufficient resources • Political goodwill	• Budget allocation • Stakeholder involvement
Insufficient instructional/psycho motor materials	• Insufficient resources • Political goodwill	• Insufficient resources • Political goodwill	• Public private partnership • Budget allocation • Stakeholder involvement
Inadequate training machine and equipment	• Low resource mobilization from within and without to purchase training equipment • Goodwill	• High cost (Expensive) • Political goodwill	• Public private partnership • Budget allocation • Stakeholder involvement
Lack of Policy's implementation	• Inadequate Financial support • Goodwill	• Insufficient resources • Political goodwill	• Public private partnership • Budget allocation • Stakeholder involvement
Low enrollment and retention	• Poverty • Information gaps	• Lack of fees • Insufficient capacity building	• Public private partnership • Stakeholder involvement
Low uptake of the CBET program	• Information gaps • Inadequate funding	• Insufficient capacity building • Insufficient resources	• Public private partnership • Stakeholder involvement
Youth and Sports Sub sector			
Inadequate land	• Not enough land to for infrastructure development • Public not willing to sell land to the county. • Attempted grabbing of land that is designated for sports development	• Inadequate land for sports infrastructure development.	• Community dialogue to avail more land for sports facilities
Youth buldge	• The young population is now more than 60% of the population of	• Inadequate funding to meet the current GENZs needs	• Public private partnerships

Development Issues	Cause(s)	Constraint(s)*	Opportunities**
	Machakos County The GenZ's need proper and specific attention to their growing needs and concerns		Increased budget allocation
Gender and Social Welfare Sub sector			
Inadequate gender mainstreaming in the County programmes	Lack of capacity building in all sectors	Insufficient knowledge in gender mainstreaming	Training collaboration with partners in the county.
Immobility, hearing impairment and other disability issues	Lack of assistive devices	Huge No. of unassessed persons with disabilities	Availability of partners working on disability issues
Increasing No. of needy and vulnerable persons	Lack of empowerment tools/equipment	Insufficient budget	- Increase budget for group empowerment tools/equipment - Collaboration with partners in the county
Low economic empowerment and capacity building of women, PWDs and self-help groups	Lack of training	Insufficient budget	- Initiate table banking to support women and women self-help groups - Promote self-employment among women and PWDs.
Increasing No. of GBV cases and teenage mothers and needy and vulnerable children	Increasing cases of GBV and child neglect	Insufficient knowledge on teenage pregnancies and childcare	- Increase budget for awareness creation - Collaboration with partners in the county and start Specific bursaries to support the needy and PWDs.

2.9.4 Energy, Infrastructure and ICT Sector Development Issues

Development Issues	Cause(s)	Constraint(s)*	Opportunities**
Energy Sub sector			
Insecurity in Urban areas and market centres	Increase in crime/unemployment	Inadequate funds for street lighting programs and youth employment	Available street lighting programs
Low electricity connectivity	Low electricity connectivity and production	Low power production and funds	Available rural electrification programs
Dependency on conventional energy sources e.g. wood for fuel	Lack of information on cheap and safe alternative energy sources.	Inadequate programs to sensitize the public on available cheap, safe and renewable energy sources	Availability of cheap, safe, clean and renewable energy resources

Development Issues	Cause(s)	Constraint(s)*	Opportunities**
Lack of policies to regulate the sector	Policy failure, policy Implementation -gap	Lack of capacities in public service/lack of expertise	A lot of policy gaps
Inadequate Budgetary provisions	Lack of political good will to fund energy related development issues	Inadequate funds	Available non state actors ready to partner with the county government to fund energy solutions
Roads and Transport Sub sector			
Development of health-related complications	Dust from highly trafficked earth and gravel roads trespassing through estates or residential areas	In adequate funding to upgrade these roads to high standard surfaced roads	Availability of conditional grants for municipalities that can be used to develop these roads in highly populated areas
Inaccessibility of some areas	Lack of all-weather road network and river crossing structures	Over stretching the available allocation to address multiple needs within a single financial year.	Availability of departmental allocation through equitable share that can be used to develop these roads and construct sustainable and resilience river crossing structures
High vehicle operation costs	Bumpy and poorly maintained road network	Lack of programmed maintenance schedule for gravelled and surfaced roads	Availability of conditional grants through Road Maintenance Levy Fund that can be used to ensure roads are continuously and regularly maintained
ICT Sub sector			
Security threat and Cyber attacks	Lack user awareness and ICT growing threats	Inadequate user training, poor security controls	ICT systems updates and patching, continuous user training
Dynamic and fast changing technology	Fast growth of the ICT sector	Inadequate budget to invest in the emerging technology	Internal ICT capacity to research and deploy emerging technology
Digital Economy Unit			
Inadequate digital skills	Lack of ICT infrastructure for digital skills development	Inadequate budget allocation	Potential partnerships available for skills training

2.9.5 Health Sector Development Issues

Development Issues	Cause(s)	Constraints*	Opportunities**
Erratic supply of Essential Medicines, Medical Supplies, Basic Equipment, Rehabilitation Equipment	• Insufficient budgetary allocation in HPTs. Inadequate fulfillment of EMMS requests from suppliers • Poor planning in terms of forecasting, procurement and distribution	• Limited budget allocated for HPTs • Accumulated recurrent debt at KEMSA • Resources for HPTs not ring fenced	• Political goodwill to ensure HPT availability. Departmental and county priority in ring fencing funds allocated and collected through HPTs. • Increasing revenue availability through insurance schemes (NHIF) • Implementation of FIF laws • Leverage on technology in HPT management • Anchorage of HPT directorate in legislation.
Inadequate human resources for health	• Insufficient budgetary allocation for Human resource management.	• Inability to carry out timely and adequate recruitment replacement and retention for HRH	• Political goodwill. • Pool of skilled and trained health personnel in the market
Hybrid HMIS systems of both electronic and paper based systems	• Inadequate budgetary allocation and human resources for HIMS	• Limited Budgetary allocation for HMIS • Inadequate Human resource (HMIS)	• Political goodwill • Pool of skilled and trained health personnel in the market
Lack of leadership and governance structures at KEPH level 4 and 5 health facilities	• Delayed in enactment of the Machakos Health Financing Bill by the County Assembly.	• Leadership and management gap at the level 4 and 5 Health facilities	• Political goodwill • Pool of skilled. • Enactment of the FIF Act by the National Assembly
Infrastructure to support Health service delivery	• Sub optimal health services.	• Limited capacity to offer health services	• Political goodwill • Existing policies and guidelines to support inspection, registration and gazettelement
Health care financing	• Inadequate budgetary allocation for health • Political interference in health	• Centralization health financing • Shift in Health care financing policy. • Poor community uptake of Health Insurance	• Political Good will • Existence of Universal health coverage

Development Issues	Cause(s)	Constraints*	Opportunities**
Research and Innovation	- Limited budgetary allocation for health research - Inadequate research Skills among Health care workers - Poor collaboration with research and academic institutions	Inability to conduct and document operational research in health	- Availability of academic institutions, health data bases - Existence of Ethics and Research committee

2.9.6 Land, Environment and Natural Resources Sector Development Issues

Development Issues	Cause(s)	Constraint(s)*	Opportunities**
Lands and Physical Planning Sub sector			
Stalled developments	Untimely funding	- Delays in funds release - Inadequate funds	Available human resource capacity
Housing and Urban Development Sub sector			
Inadequate staff housing	- Increased staff population - Limited No. of staff houses	Biased allocation of staff houses	Good political goodwill
Dilapidated condition of the existing staff houses	Insufficient budgetary allocation for maintenance of existing staff housing	Lack of proper housing records	-
Dilapidated support housing infrastructure	High cost of support infrastructure	Budget constraints	Environmentally friendly and affordable construction material
Inadequate affordable/social housing	High cost of housing	Budget constraints	- Ongoing affordable staff housing programmes (National govt./County govt./Partners) - Available waivers in housing
Inefficient markets operation/systems	Rapid growing markets population	Limited availability and access to markets	Availability of vast land for creation of markets
	Inadequate classification of markets	Inadequate prioritization	
Unsustainable solid waste management	Undefined dumpsites/zones	Inadequacy of tools and equipment	- Availability of vast land for sewer collection and handling - Good political will
	Lack of designated spaces for disposal of hazardous solid waste asbestos	Inadequate technologically upto-date equipment	

Development Issues	Cause(s)	Constraint(s)*	Opportunities**
	- Weak institutional capacity to control developments in urban areas - Inadequate water and sanitation infrastructure;	- Inadequate policy and legal frameworks to guide physical and urban planning - Budget constraints	- Good political will - Availability of development partners for collaboration
Unsustainable sewerage and sewer systems management	Inadequate of public sensitization on waste handling matters	Instances of delayed funding in solid waste management	- Suitable terrain for sewer conveyance - Good political will - Availability of development partners for collaboration
Inadequate street Naming	Lack of street addressing policy	Budget constraints	Good political will
Inadequate urban governance structures	- Inadequate operationalization of the cities/towns/municipalities (some do not have town committees) - Lack of defined boundaries for towns		
Environment & Natural Resources and Climate Change Sub sectors			
Erratic weather patterns	Climate change	Untimely planning	Resource efficiencies and cost savings

2.9.7 Public Administration Sector Development Issues

Development Issues	Cause(s)	Constraint(s)*	Opportunities**
Office of the Governor Sub sector			
Lack of feedback mechanisms	Lack of adoption of complaints and feedback mechanism	Inadequate funding for the sensitization of complaints and feedback mechanism	Operationalization of complaints and feedback mechanism
Inadequate dissemination of public policies	Lack of public policies dissemination framework	Insufficient budgetary allocation	Development of public policies dissemination framework
Financial Services Sub sector			
Budget implementation	- Late disbursement of funds - Underperformance of Own Source Revenue	Resource Envelope	Revenue enhancement
Insufficient Budget allocation for priority projects	- High wage bill - Underperformance of Own Source Revenue	Budget	- Revenue enhancement - Proper planning
Economic Planning & ERM Sub sector			
Inadequate Resources	Limited resources for development	Inadequate funding	Good working relationship with the developed partners

Development Issues	Cause(s)	Constraint(s)*	Opportunities**
Revenue Management Sub sector			
Inadequate feedback mechanisms	• Outdated valuation roll	• Insufficient budgetary allocation	• Availability of Revenue Management System
Insufficient office space	• Insufficient budgetary allocation	• Insufficient budgetary allocation for development	• Lobbying for increased budget allocation for Revenue office construction
Public Service & Performance Management Sub sector			
Lack of equal training opportunities and Internship Programmes	• Staff and authorized officers not adhering to departmental Training Needs Assessment Reports • Lack of Internship budget	• Inadequate funding for training	• Collaboration with donors, NGO's & Government training agencies e.g. KSG • Availability of KDSP-funded trainings • Availability of DHRC to approve trainings
Lack of team management programmes	• Inadequate funding • Lack of awareness on the importance of team building and team performance	• Insufficient budgetary allocation for team work initiatives • Poor inter-departmental collaboration • Lack of proper sensitization Programmes for the authorized officers and other key decision makers • Lack of CSR initiatives	• KDSP funding • Soliciting for budget allocation from the county assembly • Existence of the department of environment and natural resources • Collaboration with government and non-government environmental champions and agencies • Political goodwill
Staff without personal numbers	• Absence of pre-requisite documents • Process delay	• Delay in submission of documents to requisition or reactivate personal numbers • Unstable internet connectivity to support constant internet supply • Delay in processing the payroll number by DPSM due to work overload	• Availability of skilled workforce • Availability of new technology e.g. internet tethering • Good working relationship with DPSM
Absence of automated staff register	• Lack of proper ICT infrastructure to support paper-free records management • Lack of continuous capacity building programs for record management staff	• Inadequate funding • Unreliable internet connectivity	• Collaboration with willing donors • Availability of records management workforce • Available manual database for staff records
Lack of a comprehensive staff benefit scheme	• Lack of budget for Car and Mortgage	• Lack of implementation of staff car and mortgage scheme due to delay of approval by the County Assembly	• Availability of draft staff car and mortgage policy • Presence of county assembly to approve policies and guide on staff benefit scheme

Development Issues	Cause(s)	Constraint(s)*	Opportunities**
			• Lobby for budget allocation from the county assembly
Poor Performance Management	• Inadequate resources to meet performance targets • Failure to reward good performance hence loss of value for the process • Lack of knowledge on the importance of performance management • Failure to train and sensitize both Senior and Junior officers on the importance of planning and budgeting for performance management • Failure to track employee daily achievements and level of productivity.	• Inadequate funding • Lack of a customized performance management policy • Mismatch between skills and job designations. • Absence of Integrated Human Resource Management System and automated daily attendance management system	• Existence of performance evaluation tools • Availability of performance management policy by the Public Service Commission • KDSP funding • Availability of schemes of service • Existence of biometric data for all employees.
Lack of staff motivation	• Stagnation and lack of promotions among staff in various cadres • Lack of facilitation and recognition of good performance • Delayed promotions programmes for good performance	• Absence of career progression guidelines for various cadres • Lack of staff facilitation while within and away from work stations • Absence of rewarding and recognition	• Availability of scheme of service for most cadres • Availability of DHRAC to deliberate on human resource management of staff matters • Collaboration of County Public Service Board
Poor succession planning and lack of employee retention strategies	• Lack of operational succession plan and employee retention strategies	• Absence of approved succession management policy and employee retention strategies • Inadequate funding for succession management initiatives	• Existence of draft succession management and employee retention policy
Poor implementation of employee health and safety act (OSHA)	• Lack of basic occupational safety and health information among employees • Lack of safety equipment/protective gears • Non-compliance to existing Safety and Health laws	• Insufficient budgets to provide for WIBA Insurance and claim compensations • Inadequate staff training on Safety and Health	• Existence of Occupational Safety and Health laws and regulations • Collaboration with the Ministry of Labour and other stakeholders.
County Administration & Decentralized Units Sub sector			
Administration and Support services	• Lack of facilitation for work performance	• Insufficient budgetary allocation	• Existence of annual procurement plans

Development Issues	Cause(s)	Constraint(s)*	Opportunities**
	Poor maintenance of office spaces	Lack of sufficient funds for operational facilitation	Support from the procurement unit
Inspectorate Services Sub sector			
Human Resource	- Low No. of well-trained staff - Lack of continuous training of staff - Lack of sufficient structures to absorb highly qualified staff - Exit of key staff to another department	- Inadequate budgets to support staff training - Inadequate systems to absorb and maximumly utilize highly qualified staff	- Kenya School of Government readily available to train staff - Available well-trained NYS graduates who can transfer skills to new staff - Establishment of the Inspectorate Act and Scheme of Service to streamline department
County Public Service Board Sub sector			
Court cases	Disciplinary cases	Lack of staff induction and continuous training	Competent Board and secretariat at the CPSB
Office of the County Attorney Sub sector			
Insufficient budgetary allocation	Lack of mapping of the office as an independent department	Inadequate budget allocation	Lobbying for increased budget allocation
Inadequate technical staff	Lack of sufficient budget for recruitment	Insufficient budget for recruitment and salaries	- Proposed review of the approved staff establishment and organogram - Lobbying for increased budgetary allocation
Insufficient training opportunities for the staff	Insufficient funds	Insufficient budgetary allocation for training	Lobbying for increased budget allocation for trainings

2.9.8 Water and Irrigation Sector Development Issues

Development Issues	Cause(s)	Constraint(s)*	Opportunities**
Water Sub sector			
Inadequate water supply	- Prolonged drought as a result of climate change - Uncontrolled sand harvesting in rivers - Encroachment of catchment areas - Water pollution - Inadequate water storage facilities	Limited resources	- Presence of water aquifers - Long rain seasons - Existing water catchment areas - Existing water supply infrastructure - Goodwill from development partners - Public Private Partnerships - Water recycling - Availability of Sand harvesting Act
Low water connectivity	- High cost of reticulation - Sparse population in some areas	Limited resources	Goodwill from water companies

Development Issues	Cause(s)	Constraint(s)*	Opportunities**
Vandalism of water infrastructure	• Inadequate civic engagement • High poverty levels	• Low community ownership	• Political goodwill • Good will of project beneficiaries through community support and project acceptability • Transfer of water projects in commercially viable areas to WSPs • Project management committees • Community involvement through locally-led proposal development for projects, labour provision, paying for the services • Goodwill of law enforcement agencies • Inclusion of water infrastructure to the Critical Infrastructure Protection Unit (CIPU)
Low water storage capacity	• High cost of storage infrastructure • Siltation of existing sources	• Limited resources	• Availability of land • Partnership with private sector on provision of storage facilities as part of corporate social responsibility
Poor water quality	• Uncontrolled solid waste management • Encroachment of water sources • Poor farming methods within water catchment areas • Contamination with waste water • Lack of designated draw-off points • Degradation of catchment areas	• Insufficient enforcement • Low personnel	• An expanded project mix – water treatment, water quality analysis and irrigation • Presence of legislation e.g. water, health and environment Acts and Water Policy • Goodwill from NEMA and WRA
Non-revenue water	• Water leakages • Illegal water connections	• Aging infrastructure • Poor management	• Support from WWDA, WSTF and County Government
High cost of water	• High energy costs	• High levels of poverty	• Availability of green energy/hybrid sources of power
Irrigation Sub sector			
Inadequate water for irrigation	• Competing water needs	• Limited resources	• Political goodwill • Existing water sources • Technological advances – embracing climate smart agriculture
Low up-take of irrigation	• Lack of sensitization	• Limited resources	• Existing irrigation schemes
Sanitation Sub sector			
Poor Sanitation	• Low connectivity of sewer network in urban centers	• Poor planning in Municipalities • Encroached way leaves	• Upcoming sewer master plan for major and growing towns

Development Issues	Cause(s)	Constraint(s)*	Opportunities**
	• Dilapidated sewer infrastructure e.g. Mitheu	• Limited Resources	• Goodwill from development partners • Public Private Partnerships
	• Population influx in major towns	• Limited funding to develop sanitation infrastructure	• Possibility of onsite sanitation treatment e.g. DTF
	• Vandalism of sewer trunks along farming lands	• Inadequate enforcement	• Completion of sanitation value chain by collecting treated effluent and fecal sludge for re-use
	• Open defecation in informal settlements	• Inadequate space to develop sanitation infrastructure	• Availability of public land to develop sanitation infrastructure
	• Inadequate reticulation of water to public toilets	• Limited funding	• Proximity to boreholes and other water sources
	• Inadequate sanitation facilities in markets	• Limited funding • Vandalism and destruction of existing structures	• Partnering with relevant stakeholders • Funding from county and national governments
	• Poor emptying and disposal of waste water from septic tanks	• Limited exhaustion services	• Availability of exhaustion services in major towns
	• Poor fecal sludge management	• Limited space for disposal of treated sludge	• Reuse as charcoal briquettes and soil conditioner
High cost of sanitation for informal settlements	• High rates set by the regulatory agencies	• Limited resources • Lack of physical planning in informal settlements	• Appeal for affordable rates • Engage physical planning department in implementation of sanitation programs

CHAPTER THREE: COUNTY STRATEGIC PRIORITIES, PROGRAMMES AND PROJECTS

3.1 Sector Overview

This chapter contains strategic initiatives and programmes that the County plans to implement in various sectors in the financial year 2025/2026. The priorities for each sector are linked to cross-cutting issues among them Disaster Risk Management, Environmental Degradation, Climate Change, Gender, Youth and Persons with Disability, Green Economy considerations among others.

3.1.1 Agriculture and Co-operatives Development Sector

The sector comprises Directorates of Crops, Livestock, Veterinary Services, Fisheries, and Co-operatives Development. It promotes an innovative, commercially oriented and modern agriculture, livestock and fisheries sector through development and enactment of enabling policy and legal framework for sustainable socio-economic development. Further, it provides leadership and participatory involvement in co-operatives societies, which promote economies of scope and scale and strengthen members' bargaining power to secure better incomes and social security.

Sector Vision

To be a food secure and wealthy County.

Sector Mission

To ensure food security by promoting innovative and competitive crop and animal husbandry practices through creation of an enabling environment and ensuring sustainable natural resource management.

Sector Goal

Reduce Poverty, raise incomes and improve food security

Sector Key Objectives

- i. To increase Agricultural Productivity
- ii. To diversify Crop Production
- iii. To enhance Livestock Farming
- iv. To promote Agribusiness and Value Addition
- v. To enhance Food Storage and Distribution
- vi. To invest in Irrigation and Water Management
- vii. To promote Sustainable Agriculture Practices
- viii. To improve Access to Agricultural Extension Services
- ix. To enhance Food Security
- x. To strengthen Farmer Co-operatives

Table 3. 1: Summary of Agriculture and Co-operatives Development Sector Programmes

Sub Programme	Key Outputs	Key Performance Indicators	Baseline (current status)	Planned Targets	Resource Requirement (KSh. in Millions)
Agriculture Sub sector					
Programme 1.1: Agriculture Sub sector Administration, Planning and Support Services					
Objective: To enhance efficiency and effectiveness in service delivery					
Outcome: Enhanced service delivery					
SP 1.1.1: Employees Compensation	Compensated employees	No. of Employees compensated	324	213	217
SP 1.1.2: Building Infrastructure	Renovated offices	No. of offices renovated	4	2	10
Crop Development Unit					
Programme 1.2: Agricultural Crop Production					
Objective: To increase crop production per unit area					
Outcome: Increased crop productivity					
SP 1.2.1: National Agriculture Value Chain Development Project	Secured Micro project grants	No. of Micro project proposals funded	0	100	50
	Developed Market infrastructure	No. of market infrastructure developed	0	1	50
	Developed Irrigation Infrastructure	No. of Irrigation infrastructure developed	0	1	70
SP 1.2.2: Small scale Irrigation and Value Addition II	Developed water and soil conservation and Irrigation infrastructure	No. of water and soil conservation & Irrigation Infrastructure Developed	26	1	100
	Farmers/groups supported with kitchen garden kits and fruit tree seedlings	No. of farmers/groups supported with kitchen garden kits and fruit tree seedlings	15,400	1,000	1
	Procured and distributed Value addition equipment	No. of value addition equipment procured and distributed	0	5	12
	Livestock and crop produce Markets established	No. of livestock and crop produce Markets established	0	1	10
	Certified Seeds Procured and distributed	Quantity of seeds procured in tons	1,041.26	333	100
SP 1.2.3: Agricultural Farm Inputs		No. of farmer Beneficiaries	536,264	100,000	2
	Fertilizer Procured and distributed	Amount of Subsidized fertilizer procured (Tons)	1,850	10,000	250
		No. of farmers Beneficiaries		100,000	
	Tractors Procured	No. of tractors	43	3	30

Sub Programme	Key Outputs	Key Performance Indicators	Baseline (current status)	Planned Targets	Resource Requirement (KSh. in Millions)
	Land Ploughed	No. of acres ploughed	15,346	3,000	12
	Pesticides procured and distributed	No. of farmers Beneficiaries	8,166	20,000	20
SP 1.2.4: Water Harvesting and Conservation	Constructed dams	No. of dams constructed	5	4	50
	Irrigated agricultural land	New acreage under irrigation	0	1	80
SP 1.2.5: Soil Fertility Management	Tested and analysed soil samples	No. of samples tested	0	6,000	18
SP 1.2.6: Model Farms	Model farms	No. of model farms established	0	10	5
SP 1.2.7: Crop Propagation and Multiplication Units	Accessible quality and affordable crop propagation and multiplication units	No. of crop propagation and multiplication units set	0	2	40
Programme 1.3: Agricultural Extension Services					
Objective: To improve extension service delivery					
Outcome: Enhanced dissemination of extension services					
SP 1.3.1: Extension Service Delivery	Recruited Agricultural Extension Officers	No. of officers recruited	7	25	12.5
	Trained staff	No. of officers trained	136	136	11
	Purchased extension vehicles	No. of vehicles purchased	6	5	30
	Procured extension motorbikes	No. of motorbikes procured	58	10	2.5
	Trained/Reached farmers	No. of farmers trained on modern farming methods	158,812	120,000	180
SP 1.3.2: Farmer Digitalization	Farmers/Stakeholders Portal	No. of farmers digitized/captured	257,812	100,000	10
Programme 1.4: Farm produce Promotion and Market accessibility					
Objective: To Improve produce market volumes					
Outcome: Increased farm incomes and Market volumes					
SP 1.4.1: Exhibitions and Trade fairs	Held trade fairs/Exhibitions	No. of trade fairs/exhibitions held	12	9	3
SP 1.4.2: Value Addition, and Processing	Aggregation centres	No. of aggregation centres established	3	8	2
Programme 1.5: Post-harvest Management					
Objective: To reduce post-harvest losses					
Outcome: Reduced post-harvest losses					
SP 1.5.1: Post-harvest Management	Constructed Silos	No. of Silos constructed	0	1	5
	Procured moisture meters	No. of moisture meters procured	2	10	

Sub Programme	Key Outputs	Key Performance Indicators	Baseline (current status)	Planned Targets	Resource Requirement (KSh. in Millions)
	Trained farmers and Cereal Traders on use of appropriate storage structures and Equipment	No. of farmers and cereal traders trained on use of appropriate storage structures and Equipment	106,963	40,000	0.4
Programme 1.6: Climate Change Mitigation					
Objective: To mainstream climate change in agriculture policies and activities					
Outcome: Enhanced resilience to climate change risks					
SP 1.6.1: Agroforestry	Fruit tree nurseries	No. of fruit tree nurseries established	0	40	2
	Distributed fruit seedlings	No. of fruit seedlings distributed	69,570	80,000	10
SP 1.6.2: Household Farm Ponds	Lined Farm ponds	No. of farm ponds established and lined	78	2,000	160
SP 1.6.3: Development of Irrigation Schemes	Developed Irrigation Schemes	No. of Irrigation Schemes Developed	7	1	120
Programme 1.7: Machakos Agricultural Training Centre					
Objective: To capacity-built extension staff and stakeholders in modern and evolving agriculture technologies, and entrepreneurial skills					
Outcome: Improved access to agricultural trainings, innovations and technology					
SP 1.7.1: Machakos ATC Renovation and Modernization	Renovated facilities	No. of facilities renovated	3	1	20
	Modern Farm				
SP 1.7.2: Institution Revolving Fund	Revolving fund allocated for the ATC	Amount of funds allocated for the ATC Revolving fund	0	1	5
Livestock Development Unit					
Programme 1.8: Livestock Feed and Nutrition					
Objective: To enhance quality production, conservation and efficient management of feed resources					
Outcome: Livestock Feed and Nutrition security improved					
SP 1.8.1: Pasture and Fodder Production	Farmers of trained on pasture production	No. of farmers benefiting and trained on pasture production/year	300	2,000	5

3.1.4 Energy, Infrastructure and ICT Sector

This sector comprises of Energy, Roads, Public Works and ICT sub sectors. These sub sectors serve as crucial economic enablers, possessing the potential to transform the County's status from that of a developing, third-world County to a thriving, first-world County. By acting as catalysts for growth, they create linkages with other sectors, thereby contributing to broad-based development that touches every aspect of the County's economy. To harness the transformative power of these sub sectors, the County will implement a series of targeted programs designed to expand economic opportunities, boost employment, and enhance the overall competitiveness of the County.

Sector Vision

To be a leading sector in provision of modernized infrastructure that promotes economic growth.

Sector Mission

To promote economic growth through provision of efficient, affordable, reliable infrastructure and energy for all.

Sector Goal

To reduce cost of doing business and sustain world-class state of infrastructural facilities that support current and future development.

Sector Key Objectives

Energy Sub sector

- i. Promote Renewable Energy
- ii. Expand Rural Electrification

Infrastructure Sub sector

- iii. Develop and Maintain Transportation Infrastructure

ICT Sub sector

- iv. Expand Broadband Access
- v. Promote Digital Literacy
- vi. Support E-Government Services

3.1.5 Health Sector

This sector is composed of medical services, public health and health infrastructure sub sectors. The sector plays a significant role in safeguarding and enhancing the health and well-being of the County's residents. By focusing on health improvements, the sector helps lay a strong foundation for sustainable development and prosperity. For the financial year 2025/2026, the sector will implement a series of strategic programs designed to address the health needs of the population and align with both national and international health standards and priorities. These programs will be geared towards preventing diseases, promoting health, and providing accessible, high-quality healthcare services to all. Specific initiatives will include the expansion of healthcare facilities and the enhancement of existing infrastructure to ensure that medical services are available even in remote areas of the County.

Sector Vision

A Universal leader in provision of holistic health care and emergency services.

Sector Mission

To provide the highest attainable standards of quality health care which is dynamic, affordable, accessible, equitable, acceptable, sustainable, efficient and effective to all.

Sector Goal

Improved livelihoods and health care services for residents of Machakos County.

Sector Key Objectives

- i. Expand Access to Quality Healthcare
- ii. Strengthen Healthcare Infrastructure
- iii. Enhance Health Promotion and Disease Prevention
- iv. Improve Maternal and Child Health
- v. Promote Nutrition and Food Security

3.1.6 Land, Environment and Natural Resources Sector

This sector is composed of land, urban development & housing, climate change and environment & natural resources sub sectors. The sector is charged with promotion of sustainable use of land and natural resources while ensuring the conservation and protection of the environment. This mandate is essential for the County's socio-economic development. By safeguarding natural resources and promoting sustainable land use, the sector aims to create a balance between economic growth and environmental stewardship, which is vital for the long-term well-being of the residents and ecosystems. This is achieved through fostering efficient land administration and management practices, for instance, ensuring equitable access to land and natural resources, providing secure land tenure, and encouraging responsible and sustainable use of these resources.

Sector Vision

To be the leading sector in land administration, sustainable urban development and management of environment and natural resources.

Sector Mission

To improve livelihoods through land management, sustainable urban development, access to decent housing and sustainable management of environment and natural resources.

Sector Goals

- i. Improved land administration and sustainable management of land resources.
- ii. Sustainable urban development and improved access to adequate and decent housing.
- iii. Protected, conserved and managed environment and natural resources.
- iv. Enhanced adaptive capacity and resilience to climate change.

Sector Key Objectives

- i. To improve land administration and sustainable management of land resources.
- ii. To sustain urban development and improve access to adequate and decent housing.
- iii. To protect, conserve and manage environment and natural resources.
- iv. To enhance adaptive capacity and resilience to climate change and promote low carbon development.

3.1.7 Public Administration Sector

Public Administration Sector comprises the following sub sectors: Office of the Governor, County Assembly, Finance, Economic Planning, Revenue Management, County Administration & Decentralized Units, Inspectorate Services, Firefighting & Emergency Services, County Public Service & Performance Management, County Public Service Board and Office of the County Attorney.

The sector plays a pivotal role in providing overall leadership and oversight in the management of County affairs, by ensuring that policies are effectively formulated, implemented, and monitored to achieve optimal service delivery and equitable development. By coordinating these activities, the sector creates an enabling environment that promotes accelerated and sustained economic growth. This is achieved through the pursuit of prudent economic and fiscal policies, alongside the efficient management of the County government's financial operations.

One of the sector's primary functions is to enhance strategic leadership in coordinating decentralized services, through maintaining law and order, effectively managing disasters, and ensuring the highest standards of public service delivery. The sector also focuses on optimizing

the County's human resources by deploying skilled personnel in the most effective manner to meet the needs of residents. It also provides leadership in promotion of County governance through effective legislation, oversight and representation. By facilitating transparent and accountable governance structures, the sector fosters a culture of integrity and responsiveness, ensuring that the needs and rights of all citizens are represented and addressed.

The Finance sub sector offers leadership and oversight in managing the County's financial resources. Together with the Economic Planning sub sector, it achieves its mandate through policy formulation, implementation, and the monitoring of results, thus ensuring that resources are utilized efficiently and are equitably distributed across the County. This approach not only guarantees effective service delivery but also supports balanced regional development, reducing disparities and enhancing the overall quality of life for all residents.

Sector Vision

A leading sector in legislation, public policy formulation, coordination, supervision and prudent resource management.

Sector Mission

To provide good governance and efficient service delivery through policy formulation and implementation, co-ordination, supervision, financial management, legislation and oversight.

Sector Goal

Provision of good governance, legislation and oversight.

Sector Key Objectives

- i. Improve Service Delivery
- ii. Strengthen Public Financial Management
- iii. Foster Good Governance
- iv. Enhance Human Resource Management
- v. Ensure Equal Access to Public Services
- vi. Enhance Citizen Engagement and Participation
- vii. Strengthen Public-Private Partnerships

- viii. Promote Data-driven Decision Making
- ix. Streamline Regulatory Processes

3.1.8 Water and Irrigation Sector

The sector comprises of three sub sectors, that is, Water, Irrigation and Sanitation. The sector is mandated with the vital responsibility of ensuring that all residents have access to an adequate and reliable supply of clean water, comprehensive sewerage services, and well-developed irrigation and water storage systems. Achieving this mandate is essential for the County's overall well-being, supporting both public health and socio-economic development. The sector's efforts will focus on expanding and enhancing water infrastructure, improving the quality of water services, and ensuring sustainable water management practices.

To meet these objectives, the sector will implement a variety of strategic initiatives, including the drilling and rehabilitation of boreholes across the County. This will increase the availability of groundwater sources, particularly in areas where access to water is limited. Additionally, the construction and desilting of earth dams and water pans will be prioritized to harvest and store rainwater. These water storage facilities will not only serve domestic needs but also support agricultural activities, boosting food security and supporting local livelihoods through enhanced irrigation.

The sector will also focus on providing sanitation facilities in public spaces. Further, it will be keen on expanding and upgrading the County's sewerage systems to ensure effective waste management and prevent contamination of water sources. By extending sewer networks and

constructing modern wastewater treatment plants, the sector will help maintain environmental hygiene and reduce health risks associated with poor sanitation. This infrastructure improvement will be particularly important in rapidly growing urban areas, where increased population density exerts additional pressure on existing systems.

Sector Vision

A national leader in the management and development of sustainable water resources.

Sector Mission

To promote and support water resources management for safe water availability and accessibility.

Sector Goal

A world-class County in provision of safe water for domestic, irrigation and industrial use.

Sector Key Objectives

- i. To Improve Access to Safe Drinking Water
- ii. To Enhance Sustainable Water Management
- iii. To Increase Water Storage Capacity
- iv. To Expand Irrigation Infrastructure
- v. To Promote Rainwater Harvesting
- vi. To Improve Access Sewer Services and Sanitation

	Goal 6: Blue/Ocean economy for accelerated economic growth	• Sustainable exploitation of resources in the oceans, rivers and lakes • Provision of programmes aimed at conserving water bodies

CHAPTER FOUR: IMPLEMENTATION FRAMEWORK AND RESOURCE REQUIREMENT

4.1 Introduction

This chapter outlines the County's institutional arrangements and defines the specific roles each entity will play in implementing the Annual Development Plan 2025/2026. Further, the chapter details the available resources that will support the County's development initiatives. A thorough risk assessment that identifies potential challenges that may hinder the implementation of this Plan, has also been covered in this chapter.

4.2. Implementation Framework

The implementation framework outlines the structures and processes that involve various stakeholders with defined roles to ensure effective execution of development projects and programmes.

Table 4. 1: Stakeholders and their Role in CADP 2025/2026 Implementation

S/No.	Sector/Institution	Role in Implementation
1.	County Executive Committee	• Policy formulation, implementation and resource allocation • Conducting performance reviews
2.	County Assembly	• Enacting appropriate laws and policies • Budget approval and review of plans • Oversight in development interventions
3.	County Government Departments	• Coordinate projects implementation • Collaborations and ensuring accountability • Technical support • Ensures alignment with development goals • Provide policy advice and feedback
4.	County Planning Unit	• Provide policy advice and feedback • Technical support • Monitoring and evaluation • Ensures public involvement in decision making • Ensures community needs are reflected in the development priorities
5.	Other National Government Departments and agencies in the County	• Provision of policy guidelines • Collaborations and ensuring accountability Technical support • Funding and capacity building
6.	Development Partners	• Technical and Financial Support • Provide policy advice and feedback
7.	Civil Society Organizations, NGO's & FBO's	• Provide policy advice and feedback community sensitization • Transparency and accountability • Capacity building
8.	Private Sector	• Provide policy advice and feedback

4.3 Resource Mobilization and Management Framework by Sector and Programme

This section outlines the projected resource needs for each sector, including revenue forecasts, estimated resource gap, and strategies for bridging the gap. Some of the strategies include expanding the County's revenue base through various initiatives, partnering with the national government for resource sharing, and exploring opportunities to attract external funding.

4.3.1 Resource Requirement by Sector and Programme

The specific resources necessary for implementing the programmes and projects outlined in this Plan are as detailed in Table 4.2 below.

4.3.2 Revenue Projections

In the financial year 2025/2026, the County Government projects to raise revenue through Own Source Revenue, Equitable Share and Conditional Grants as shown in table 4.3:

Table 4. 3: Revenue Projections for FY 2025/2026

Revenue Stream	Projected Amount (KSh.)
Equitable Share	9,914,003,936
Equalization Fund	-
Own Source Revenue	2,829,522,355
Hospital Revenues (A-I-A)	721,350,000
Conditional Grants	1,000,511,971
Unconditional Grants	1,708,218
	14,467,096,480

4.3.3 Estimated Resource Gap

Following the resource requirements and revenue projections in Tables 4.2 and 4.3 above, the County's resource gap is as shown in Table 4.4 below:

Table 4. 4: Resource Gap

Requirement (Ksh. Millions)	Estimated Revenue (Ksh. Millions)	Variance (KSh. Millions)
27,744.82	14,467.09	13,277.73

The projected total resource required in this plan for the FY 2025/2026 is KSh. 27.74 billion. The total revenue the government projects to raise is KSh. 14.47 billion. Therefore, there is a resource gap of about KSh. 13.28 billion.

Inorder to bridge the financial resource gap the following measures will be taken into consideration;

- i. The County Government shall improve revenue collection mechanisms by enhancing the capacity for revenue collection and enforcing existing laws
- ii. The County Government shall improve the efficiency of resource use by streamlining its operations.
- iii. The County Government shall also seek grants and donations through engagements with Development partners.

- iv. The County Government shall also enter into Public-Private Partnerships with businesses to finance and deliver development projects. This could be a way to leverage private sector resources to achieve the County's development goals.

4.4 Risk Management

Risk management is an integral component in project implementation. This section highlights the key anticipated risks that could potentially hinder the successful implementation of the CADP 2025/2026. It outlines the possible implications of these risks, which could affect various aspects of development. To ensure the sustainable development of the County, this section also presents proposed mitigation measures designed to manage and minimize these risks.

Table 4. 5: Risk Management

Risk Category	Risk	Risk Implication	Risk Level (Low, Medium, High)	Mitigation Measures
Financial	Inadequate Financial Resources	Stalled projects	Medium	Enhance resource mobilization Strategies; Allocation of resources efficiently
Technological	Cyber Security Risk	Data breaches, Financial losses & Legal consequences	High	Investment in cyber security and software acquisition
Organizational	Skills Resource Risk	Additional cost of personnel training and capacity building	Low	Enhance the skills and capabilities of personnel
	Inadequate Human Resource Capacity	Inefficiency in service delivery	Medium	Timely recruitment
	Communication Risk	Loss of data or misinformation	Medium	Effective and timely communication
Political	Political Instability and Changes	Political instability & Policy changes	Medium	Continuous engagement with the stakeholders
Public Health	Inadequate Health Financial Resources	Strain health care systems	High	Enhance public health systems and continuous monitoring
Climate Change	Drought	Loss of livestock and reduced crop productivity	High	Climate smart agricultural practices

Risk Category	Risk	Risk Implication	Risk Level (Low, Medium, High)	Mitigation Measures
Laws, Policies and Procedures	Compliance Risk	Legal suits, penalties, fines and violation of contracts	Medium	Adherence to stipulated laws and regulations
Public Image	Reputation Risk	Public mistrust	Low	Management of integrity and high staff competence
Natural Occurrences	External Hazards Risk (i.e.) storms, floods, vandalism, and civil unrest)	Destruction of infrastructure Stalled Projects	High	Continuous monitoring by implementing mechanisms for ongoing risk assessment and adjustment of strategies

CHAPTER FIVE: MONITORING, EVALUATION AND REPORTING

5.1 Introduction

Monitoring and Evaluation (M&E) provides a structured framework for systematically tracking progress, assessing outcomes, and ensuring accountability throughout the implementation process. It is a crucial component in the execution of the Plan's objectives and the achievement of its desired impact. In this chapter, the Plan's activities, outputs, and outcomes are closely monitored and evaluated, this help in facilitating evidence-based decision making. Through this systematic observation, M&E enables the timely identification of issues and the implementation of corrective measures, thereby maximizing the efficiency and effectiveness of the Plan.

A robust M&E strategy equips policymakers and stakeholders with reliable, data-driven insights, offering a foundation for adaptive management. This approach allows for course corrections and optimization based on real-time information, ensuring that the Plan remains responsive to changing conditions and emerging challenges.

M&E places a strong emphasis on transparency, objectivity, and stakeholder participation, reinforcing the development Plan's commitment to fostering an inclusive, accountable, and results-oriented approach. By integrating systematic data collection, rigorous analysis, and continuous feedback loops, M&E paves way for evidence-based decision-making and strategic adjustments. This process not only enhances the Plan's impact but also aligns it with the developmental aspirations of the people, ensuring that the County's growth and progress are both sustainable and inclusive.

5.2 Data Collection, Analysis and Reporting Mechanism

The Department of Economic Planning and External Resources Mobilization holds the primary responsibility for the overall M&E of the County Annual Development Plan. The M&E will be done through field visits, observation, surveys and photographic documentation. The department will gather data from all County departments, analyze this information, and produce quarterly and annual progress reports. These reports will serve as critical tools for informing decisions, planning, and budgeting, and policy formulation. To ensure transparency and accountability, the findings

will be shared with the public through various channels, including social media, official websites, and printed publications, providing a feedback mechanism.

A wide range of stakeholders will be engaged in the M&E process, including Project Management Committees (PMCs). Involving these stakeholders in assessing and analyzing the progress, outcomes, and impact of development initiatives fosters a collaborative approach to data gathering, insights, and feedback. This participatory process ensures that local perspectives are incorporated into decision-making, thereby enhancing the relevance and effectiveness of interventions. By integrating stakeholder input, the County aims to achieve sustainable development outcomes that are closely aligned with the needs and aspirations of its residents.

5.3 Institutional Framework

To successfully implement the programmes and projects outlined in this Plan, the County Government ought to establish a robust organizational structure focused on fast, efficient and innovative service delivery. Achieving the targets set forth will rely heavily on the strategic leadership provided by the Office of the Governor. The County Government is committed to upholding the principles of good governance, which are essential for ensuring efficient and equitable service delivery. These principles include Transparency and Accountability, Professionalism, Integrity, Public participation and Consultation, Timely completion of projects, among others. Upholding these core values and principles will empower the residents of Machakos and help transform the County into a model of excellence in governance and economic prosperity.

Figure 5. 1: County Government of Machakos Organizational Chart

5.4 Dissemination and Feedback Mechanism

The County will ensure that data and information are readily available and accessible to all stakeholders, including government representatives, academic researchers, policymakers, senior management, project participants, and the general public. This will help the stakeholders make informed decisions based on the best available evidence. To achieve this, the County will develop a comprehensive data dissemination Plan that; specifies the target stakeholders or audiences, identifies their specific information needs, outlines appropriate communication channels, and determines the timing and frequency of information distribution. Data and information will be

shared through various platforms and formats, including the State of the County Address, oral presentations at stakeholder meetings, written reports, fact sheets, press releases, flyers, posters, social media platforms, County websites, devolution conferences, peer-to-peer events, live events and webinars.

Additionally, the County will establish Feedback-and-Response System(s), creating a two-way communication loop that allows different sectors and departments to receive feedback from citizens and respond to their suggestions and concerns promptly. Citizens will be able to communicate their feedback through multiple channels such as public meetings, suggestion boxes, hotlines, and other accessible means. The County will implement response mechanisms to acknowledge receipt of feedback and deliver appropriate responses in a timely manner, ensuring that public concerns are addressed effectively.

Learning from Monitoring and Evaluation (M&E) initiatives and reports is also a key focus. The information generated from M&E activities will be valuable for decision-makers, policymakers, and the broader community as it provides factual and evidence-based insights. When this information is accepted and internalized, it can be transformed into knowledge products that promote continuous learning and improvement. The County will integrate learning into overall program implementation by disseminating M&E findings and making them available for use as practical knowledge. To enhance learning and application, the County will employ strategies such as critical reflection sessions, after-action reviews and peer-to-peer learning. These approaches will help improve the overall performance and quality of outcomes for ongoing and future programs, strategies, and interventions, ensuring that the County continues to advance effectively and sustainably.

5.5 Performance Indicators

This section outlines the sectoral monitoring and evaluation of outcome indicators. It provides a summary of the Programme Outcome/Output Indicators, Key Performance Indicators, the baseline situation in the beginning of the FY 2024/2025 and the targets set for the financial year 2025/2026. These indicators are essential for assessing the progress and effectiveness of the various projects

and programmes, ensuring that goals are being met and facilitating timely adjustments where necessary.

To,
All Chief Officers
County Government of Machakos

RE: ANNUAL DEVELOPMENT PLAN (ADP) FOR THE FINANCIAL YEAR 2025/2026

Reference is made to the correspondence from the National Treasury and Economic Planning (Ref: TNTEP/SDEP/4/130(70)) dated 24th July, 2024 and received on 7th August, 2024; on the guidelines for preparation of ADP 2025/2026 (copy herewith attached).

Pursuant to the County Government Act 2012, Section 104(1) "A County Government shall plan for the County and no public funds shall be appropriated outside a planning framework developed by the County Executive Committee and approved by the County Assembly." Further, the PFM Act Section 126 (1) provides that every County Government shall prepare a development plan in accordance with Article 220(2) of the Constitution; whereas Section 126 (3) provides that the County Executive Committee Member responsible for planning shall, not later than the 1st September in each year, submit the development plan to the County Assembly for its approval, and send a copy to the Commission on Revenue Allocation and the National Treasury.

In this regard, the County Government is in the process of preparing the Annual Development Plan (ADP) 2025/2026 for submission to the aforementioned authorities within the stipulated timelines. The purpose of this letter is to request your department to provide the information needed for the compilation of the said document, as per the attached templates.

Kindly submit a **signed** hard copy and a soft copy of the same (preferably MS Word) on email to planning@machakos.go.ke by close of business **15th August, 2024**.

Thank you for your continued support

ECONOMIC PLANNING CIRCULAR NO. 1/2024

**TO: Chairperson
Council of Governors**

**RE: GUIDELINES FOR PREPARATION OF COUNTY ANNUAL DEVELOPMENT
PLANS 2025/2026 FINANCIAL YEAR**

SECTION ONE

I. Introduction

1. The Constitution of Kenya created a two-tier system of governance, National Government and County Governments that requires a paradigm shift in development planning. The Fourth Schedule of the Constitution assigns the National Government 35 functions and County Governments 14 functions. Article 220(2) (a) of the Constitution states that "national legislation shall prescribe the structure of development plans and budgets of counties", while Section 105 of the County Government Act, 2012 emphasizes the need for linkages between county plans and national planning frameworks. On this basis, the State Department for Economic Planning prepares and issues various guidelines, including the CADP Guidelines for use by county governments.

Handwritten signature: J. H. Mwangi, Co-Economic Planning, 7/8/24

II. Legal Framework

2. Various laws have been enacted to strengthen development planning in the Counties which include:
 - a. The County Governments Act, 2012;
 - b. Urban Areas and Cities (Amendment) Act, No. 3 of 2019;
 - c. Inter-Governmental Relations Act, 2012;
 - d. The Public Finance Management (Amendment) Act, No. 12 of 2023; and
 - e. The Public Procurement and Asset Disposal Act, 2015, among others.

III. Purpose of the Guidelines

3. These Guidelines provide County Governments with a standard structure for preparing the County Annual Development Plans (CADPs). The Guidelines also ensure uniformity in the development of CADPs across counties and provide a framework for linking policy, planning, and budgeting at that level.

IV. Objectives and Scope

4. The CADP Preparation Guidelines are meant to ensure that the plans:
 - a. Outline strategic priorities for the medium term that reflect the county government's priorities and plans;
 - b. Describe how the county government is responding to changes in the financial and economic environment; and
 - c. Provide details of programmes to be implemented.
5. The Guidelines apply to all counties. The Guidelines are for use by county governments, other development players, and stakeholders at the county level.

V. CADP Preparation Process

6. The process of developing the CADP should adhere to the following steps:
 - a. The County Executive Committee Member responsible for Economic Planning issues a circular, with instructions and timelines to all County Accounting Officers. The County Planning Unit convenes the county government departmental/agencies forums and forms the CADP secretariat;
 - b. The county government reviews the previous Annual Development Plan to document achievements (key outputs and projects implementation status), challenges faced during the implementation of the plan and lessons learnt. In preparing the CADPs, county departments should take into consideration changes in policy priorities as outlined in CIDP or any new policies;
 - c. The county government undertakes stakeholder engagements to document their views/inputs. The county technical departments are expected to have carried out public participation forums to identify possible projects for implementation in the forthcoming financial year.

The projects should be prioritized during the Medium-Term Expenditure Framework budget-making process;

- d. The CADP secretariat analyzes the submissions from technical departments incorporating inputs from citizens and other stakeholders, and compiles a draft CADP. The Draft CADP is thereafter validated by stakeholders and submitted to the County Executive Committee for approval. The County Executive Committee member responsible for economic planning submits the approved CADP to the County Assembly for approval not later than 1st September of each year; and
- e. The County Executive Committee member responsible for economic planning shall publish and publicize the annual development plan within seven (7) days after its submission to the County Assembly.

SECTION TWO

7. Specific guidelines have been developed to direct the process to ensure effective preparation of the FY 2025/26 CADP. This section presents an overview of the CADP structure. The comprehensive structure is detailed in *Annex II*.

I. Introduction

8. In this chapter, a County government is required to provide an overview of the county, the rationale for the preparation, the linkage of the CADP with other development plans, and the process of developing the plan.

II. Review of Previously Implemented CADP

9. The Chapter provides a review of the previously implemented CADP (FY 2023/24) considering the following:
 - a. Financial performance including revenue performance, expenditure analysis, and pending bills;
 - b. Sector/sub-sector key achievements;
 - c. Status of projects;
 - d. Issuance of Grants, Benefits and Subsidies;
 - e. Contribution of achievements to the National, Regional and International aspirations/concerns;
 - f. Challenges encountered;
 - g. Emerging issues;
 - h. Lessons learnt during the implementation of the previous plan;
 - i. Recommendations; and
 - j. Development issues arising.

III. County Strategic Priorities, Programmes and Projects

10. County Governments should present sector/sub-sector strategic priorities, programmes and projects for the Financial Year as indicated in the CADP. They

should also include information on grants, benefits, and subsidies to be issued by the County Government during the plan period, where applicable. In addition, linkages on various planned programmes and projects to the National, Regional, and International aspirations such as BETA, Vision 2030 and its MTPs, the 2030 Agenda for Sustainable Development, and Climate Change mitigation, among others should be elaborated.

IV. Implementation Framework and Resource Requirement

11. The County Governments should present the implementation framework, resource requirement and risk management strategy by sector and programme as follows:
 - a. An implementation framework containing an organizational chart indicating how each department/sector will participate in the implementation;
 - b. Resource mobilization and management framework containing resource requirement by sector and programme, revenue projections and the estimated resource gap; and
 - c. The risk management strategies by sector and programme.

NB: For revenue projection, refer to relevant documents such as the County Finance Act, County Allocation of Revenue Act (CARA), Budget Policy Statement (BPS), the County Fiscal Strategy Paper (CFSP), and the approved budget, among others.

V. Monitoring, Evaluation and Reporting

12. A brief description of the Monitoring and Evaluation (M&E) structure in the county should be provided. This will include the existence of M&E policy and its operationalization, M&E committees established, the M&E unit, its staff establishment and where it is domiciled.
13. The methods and tools for data collection, analysis and reporting, key output indicators, and outcomes adopted to measure performance should also be included.

VI. Conclusion

14. The State Department for Economic Planning will provide technical support in the preparation of the CADPs in line with its mandate of building the capacity of counties to undertake the economic planning function. The CADPs will also be assessed to ascertain the levels of adherence to these guidelines.
15. As we embark on the completion and implementation of the County Annual Development Plans, let us remain steadfast in our commitment to realizing the aspirations of our respective counties. Further, in the spirit of delivering as ONE, it is important to strengthen linkages between the two (2) levels of

government in the economic planning function. I trust that these guidelines will serve as a valuable framework for the preparation of development plans that will build a more prosperous and sustainable future for all Kenyans.

16. The purpose of this communication is to request you to share the contents of this circular with all County Governors to guide the preparation of the FY 2025/26 CADPs.

Talent Gachagua says the government needs to invest heavily in telling its achievements to Kenyans

Ruto pledges to promote creative arts

At least 130,000 participants took to the national stage, representing all levels of education, including special needs

BY ANTHONY NJAGI
AND TITUS OMINDE

President William Ruto has promised increased investments in the Kenya Music Festival even as calls for more support from private organisations to promote the creative economy grow.

Dr Ruto, who hosted festival winners for a concert at Eldoret State Lodge, said the potential of the festival is big and needs to be explored fully.

"It fosters talent, promotes economic growth, preserves our cultural heritage and builds a sustainable creative ecosystem," the President said.

"The festival also provides learners the opportunity for international exposure, preparing them to compete on the world stage."

While thanking the private sector for its role in promoting the festival held in Eldoret this year, Dr Ruto called for diversification of funding.

"I urge the festival leadership to propose sustainable measures and form strong partnerships with the private sector. The festival must find alternative sources of income to ensure its sustainability and continued success," he said.

"My government has come up with programmes to support these sectors, including strengthening copyright laws to protect

intellectual property and ensuring artists receive fair compensation for their work. We are also working with county governments to establish and maintain cultural centres and performance venues, providing artists with the facilities they need to thrive."

At least 130,000 participants took to the national stage, representing all levels of education, including special needs, while 35 teams performed at the State Concert.

St Bakhita School Sabaki presented the poem "Proud of Myself," written by Ms Grace Muthu

Kiluma – a famous poet, adjudicator, elocutionist and trainer.

The poem is the voice of a child appreciating her creative achievements through the new competency based curriculum (CBC).

The child also appreciates the role of the teacher in nurturing talent.

Ngara Girls went big with "Behind The Adjudicators Table", scripted by Avulala Kevin Vanilla.

The piece portrays troubles and the pressure trainers go through when an item is being staged.

In the piece, learners tell their trainer not to panic for the festi-

val belongs to the child.

Ngenia Boys School received a standing ovation after presenting an adaptation and arrangements of pop tunes and melodies of African gospel music.

Kenyatta University had a thrilling adaptation and arrangements of secular pop tunes and melodies "Zinazovuma".

President Ruto directed Youth Affairs, Creative Economy and Sports Cabinet Secretary Kipchumba Murkomen to ensure 80 per cent royalties go to artists.

Deputy President Rigathi Gachagua praised the adjudicators and organisers of the 12-day festival.

"We have done well as a government but our stories are not told to Kenyans properly. We need to invest in how to tell our stories," he said.

Equity Bank Group donated Sh25 million to the festival on Thursday, promising an additional Sh100 million over the next four years.

Equity Bank Group CEO James Mwangi hailed creativity by learners, saying it is a tangible

way of showing the critical role played by music and other art in education.

"The learners showed creativity, critical thinking and problem-solving skills, which are key elements of the CBC. We appreciate the Kenya Music Festival committee's efforts in using this event to support positive attitudes that prepare learners for careers in music and the arts," he said.

Education Principal Secretary Belio Kipsang said the festival illustrates the impact of education and the arts on the development of young people.

"Collaboration with our partners reflects a shared commitment to nurturing talent and providing opportunities for the youth," Dr Kipsang said.

The gala concluded with awards to the top performers.

The festival has once again highlighted Kenya's remarkable talent and the significant role music plays in personal and societal growth.

Murdered bank staffer buried

BY MERCY KOSKEI

Florence Mueni Mwalimu, the 34-year-old employee of Cooperative Bank who was murdered and mutilated, was buried yesterday even investigations continue.

Mueni was last seen alive on August 6 before her body was found in a maize plantation not far from her home the following day.

The head had deep cuts, with her ears and some of her fingers missing.

Mueni arrived at her workplace on Tuesday last week. Two hours later, she walked to the manager's office and sought permission to go home and take her child to hospital. That was the last time she was seen alive.

A post-mortem report later detailed the gruesome death. The ear and fingers were cut while Mueni was still alive.

She was buried in Nkubu, Meru County, in an emotional ceremony attended by family, friends, colleagues and neighbours who demanded justice.

The funeral service was at PCEA

Parish, where the white coffin and her photo was placed near the pulpit.

Mueni's husband Erick Mureithi delivered a moving tribute, with some relatives standing by his side.

He recounted the cherished moments of their life together.

Dressed in a black suit, white shirt and a red tie, Mr Mureithi spoke of his wife's kindness, support for the family and commitment to work.

He said her death is a blow to the family and that he is still in shock.

"We fell in love while at university in 2012. We had met at a charity event for a needy student. Our marriage was in 2015," Mr Mureithi said.

He added that it is difficult to accept that his wife is dead as he did not have time to bid her farewell.

"She was taken suddenly, shockingly, painfully and brutally from our family. This is the time our two sons needed their mother the most," he said.

Mr Mureithi told the mourners that Mueni was family-oriented, adding that she abandoned her master's degree programme to be with her children and build a happy home.

"We had wonderful plans. I will miss my wife and the memories we shared will never fade. I always looked forward to being together with the children on weekends," he said.

"How I wish we could reverse time. I cannot express the emptiness inside me but I'm sure she is with the Lord."

Speaker after speaker urged police to speed up the investigations into the murder and apprehend the culprits.

Mueni's sons praised her as selfless, generous, loving and funny. Colleagues said Mueni was diligent, dedicated to her work and kind.

They said she made an impact at the bank as she served with enthusiasm and diligence, adding that Mueni's death has robbed the bank of a person of high integrity.

More than 8,000 delegates comprising artists, intellectuals and speakers from across the continent will converge at Jomo Kenyatta stadium in Mombasa for the fifth World of Black and African Festival of Arts and Culture, popularly known as Festac.

Festac, post-independence Africa's oldest festival, celebrates the continent's cultural wealth and diversity through music, visual arts, dance, fashion and sports.

Conceived by pioneer pan-Africanists like Kwame Nkrumah and Leopold Senghor, Festac was first held in Dakar, Senegal in 1966. Ten years later, it was in Abuja, Nigeria.

The festival went into hibernation for more than 40 years before being revived in Zanzibar in 2022. Last year's edition was in Arusha, Tanzania.

Why was Kisumu chosen to host Festac '24? In Arusha, Misango Arts Ensemble, directed by thespian Obat Masira, presented a biographical play – *Okot p'Bitek* on Trial by Prof Humphrey Ojwang.

Kenya's Festac Festival Ambassador Obat Masira and Festac Arusha edition opening ceremony in Tanzania May 2023. F

The play, based on Ugandan poet Okot p'Bitek, became the talk of town.

Masira, who is also the manager of the Mama Grace Onyango Cultural and Social Centre, persuaded the organisers to stage the next Festac festival in Kisumu.

Masira flew to the US in mid-Ju

Annex 8: Public Participation Report

INTRODUCTION

In accordance with Articles 10 (2a) and 220 (2) of the Constitution of Kenya, 2010; Sections 6(6), 87, 104 (4), 106 (4), and 115 (1) of the County Government Act, 2012; and Sections 132 and 126 of the Public Finance Management Act, 2012, which emphasize on the importance of public participation in the preparation of policy documents, the County Government of Machakos, through the Department of Finance, Economic Planning, Revenue Management and ICT organized a series of public consultative forums. These forums were held on 16th August, 2024 at village level and 27th - 29th August, 2024 at sub county level. They focused on gathering input for the Machakos Annual Development Plan for the Fiscal Year 2025/2026.

The forums were open to a broad range of stakeholders, including the general public, members of the business community, civil society organizations, faith-based organizations, private sector professionals, state and non state actors and other interested parties. The discussions were facilitated by the County Executive Committee Members, Chief Officers and technical officers from various departments.

The primary objectives of these public forums were to foster a sense of ownership and ensure the development process was responsive to the needs of the people. Additionally, the forums aimed to enhance accountability and transparency in the County's planning processes, strengthen local democracy, and build trust and confidence among residents and development partners. By incorporating the views of the public, the County sought to improve the quality and relevance of its plans and development strategies, ultimately leading to better service delivery for its citizens.

This report provides a detailed analysis of the issues and needs expressed by the public, categorized by the County's forty wards and their respective villages, sectors and sub sectors. The feedback gathered will be instrumental in shaping the development agenda for the County, ensuring it aligns with the aspirations and priorities of its residents.
