

I3 AI Lab Commercialization & Expansion Strategy for Kenya and East Africa

Based on the reviewed AI Lab User Guide, the platform already provides: • Managed JupyterHub environments • On-cluster LLMs through LiteLLM • Document AI and RAG capabilities • AI chat (Sage AI Lab) • Data science and ML development tools This creates a strong foundation for a commercial AI platform rather than only a training environment.

Executive Summary

Transform the platform into a regional AI Platform-as-a-Service (AI PaaS), AI Consultancy, Managed AI Services, and Industry Solutions business.

Highest Revenue Opportunities

1. AI Consultancy 2. Enterprise AI Implementation 3. AI Managed Services 4. AI Agents for SMEs
5. Private AI Infrastructure 6. AI Governance Services 7. AI Training & Certification
